PROF. DR. ARPIT CHOPRA JAIN

**M.D Homoeopathy
Critical and Surgical Disease Specialist (India)**

**INVENTOR OF
AAROGYA SUPER SPECIALITY MODERN HOMEOPATHY**

COMPLETE, EASY SAFE, FAST & COST-EFFECTIVE CURE

Dr. Arpit Chopra Jain M.D Homeopath

Critical and Surgical Disease Specialist

Dr. Arpit Chopra Jain: Transforming Global Healthcare with Aarogya super Speciality Modern Homeopathy.

Dr. Arpit Chopra Jain, a pioneer in advanced homeopathic medicine, is set to present groundbreaking clinical data comprising over 3,000 successfully treated cases of critical and surgical diseases — all cured without the need for surgery. This revolutionary treatment approach, developed and practiced exclusively by Dr. Jain, utilizes high-potency homeopathic medicines formulated by him, offering fast, safe, and side-effect-free results.

With over 21 years of experience, Dr. Jain has dedicated his life to providing an alternative yet powerful medical solution that not only preserves the body's original organs but also ensures deep, lasting cures. **His work has gained national and international recognition. He has been honored by India's Vice President, Defense Minister Shri Rajnath Singh, Health Minister Shri J. P. Nadda, and several other dignitaries.** In acknowledgment of his contributions, he has also received a prestigious honorary doctorate from the USA.

Dr. Arpit Chopra Jain proudly represents India on the international stage as the **Homeopathic Representative for BRICS (Russia)** and continues to raise the global profile of homeopathy through his one-of-a-kind center based in Indore, Madhya Pradesh, India. From this single center, he has reached and treated patients from over 19 countries, offering remote consultations and delivering life-changing results globally.

Recently, **Dr. Jain was invited as the Guest of Honor at the highly esteemed United Nations Global Excellence Awards held at the UN Headquarters in New York, hosted by the United Nations Global Peace Council.** This momentous occasion was a testimony to his relentless commitment and global vision for homeopathy.

His work is supported by real, verifiable patient testimonials, including pre- and post-treatment reports, available on his official website and YouTube channel. These authentic stories reflect the effectiveness and rapid healing power of his treatment.

This book is a humble attempt to introduce Dr. Jain's extraordinary journey and his mission — to make the world healthier without surgery, promoting natural healing through scientifically advanced homeopathic medicine. His goal is to create a safer, more cost-effective, and organ-preserving healthcare alternative for patients across the globe.

The identity of any person is his real wealth.

INTRODUCTION

Inventor of Aarogya Super Speciality Modern Homoeopathy, revolutionized treatment for complex diseases

Professor Dr. Arpit Chopra Jain

Professor Dr. **Arpit Chopra Jain**, with over 20 years of medical experience and research, has revolutionized classical homeopathy by developing a future-oriented, super-speciality modern homoeopathy treatment system. His innovative approach has given new physical, mental, and social life to thousands of patients who were once considered incurable, including those suffering from nearly 300 different diseases such as cancer, kidney failure, coma, aplastic anemia, and other serious conditions requiring surgical intervention. In doing so, he has also fulfilled the World Health Organizations (WHO) belief that true health encompasses physical, mental, and social well-being.

Originally from Chhattisgarh, Dr. Arpit Chopra Jain received his primary education in his home state before moving to Indore to pursue a Bachelors degree in Homeopathy. After completing his BHMS, he earned an MD in Homeopathy from DKMM Homoeopathic Medical College in Aurangabad, Maharashtra. During his studies and career, he worked alongside many renowned allopathic doctors in Indore and other locations, acquire practical experience and contributing to medical advancements.

Currently, Dr. Arpit Chopra Jain is providing medical services through the Aarogya Super Speciality Modern Homoeopathy Clinic, located at Janjirwala Square in Indore, where he leads a team of experienced professionals. In addition to his clinical work, Dr. Arpit Chopra Jain plays a pivotal role in shaping homeopathic education as an educator at RN Kapoor Homoeopathic Medical College. His research focuses on complex blood-related diseases, including aplastic anemia and sickle cell anemia.. Driven by a commitment to innovation, Dr. Jain has been nationally and internationally recognized for his groundbreaking contributions to the treatment of complex and incurable diseases. His exceptional service during the COVID-19 pandemic further highlights his dedication to advancing modern homeopathic medicine.

Many of Dr. Arpit Chopra Jain's patients regard him as a godsend, praising his unwavering commitment to serving humanity. Beyond his medical practice, Dr. Arpit Chopra Jain, who hails from a family of 19 physicians, is making significant contributions to society and the Nation.

He firmly believes that Aarogya Super Speciality Modern Homoeopathy - instant, effective, affordable, and without side effects is the future of homoeopathy. While homoeopathy may have originated in Germany, Dr. Arpit Chopra Jain is confident that India's revolutionary modern homoeopathic medical system will one day be recognized globally, inscribing India's name in golden letters on the world health chart. He and his team are making every possible effort to achieve this vision and will continue to do so.

Golden India's Revolutionary Discovery: Pioneering the Future of Healthcare with Advanced Homoeopathy

Homoeopathy, a system of alternative medicine established over 200 years ago by German physician Dr. Samuel Hahnemann, has experienced widespread adoption across various countries, including India. However, over time, it faced criticism and was even banned in certain regions due to persistent myths and misconceptions, such as its alleged placebo effect. Critics claimed that homoeopathic remedies were ineffective, slow to act, and not backed by scientific evidence, leading to widespread skepticism among both the public and the scientific community.

One significant issue was that classical homoeopathy relied heavily on treating patients based on symptoms alone, without extensive clinical documentation or diagnostic reports. This absence of empirical evidence made it challenging to validate its effectiveness through conventional medical research methods.

In response to these challenges, Dr. Hahnemann later developed a more potent form of homoeopathic medicine, known as the 50 millesimal potency, or 5 million power. However, by the time this advancement was introduced, classical homoeopathy had already established deep roots, and the lack of continued research, documentation, and clinical validation led to its gradual decline in some regions.

Recognizing the need to address these limitations, Professor Dr. Arpit Chopra Jain, with over 20 years of clinical and hospital experience, pioneered a groundbreaking approach known as Super Speciality Modern homoeopathy Utilizing the powerful 50 lakh potency homoeopathic medicines, along with mother tinctures, biochemic treatments, and dilutions, Dr. Jain's revolutionized the practice by effectively treating severe autoimmune conditions, including cancer, kidney failure, aplastic anemia, sickle cell anemia, rheumatoid arthritis, ankylosing spondylitis, and many other life-threatening illnesses. This innovative treatment approach has produced remarkable results, enabling patients suffering from complex and incurable diseases to recover without any side effects or lifelong medication dependency. Dr. Jain's method has proven particularly effective in cases previously deemed untreatable, such as patients in comas, those with brain tumors, or those in the terminal stages of illness.

His success extends beyond India, benefitting patients in countries such as Pakistan, Dubai, Bangladesh, the United States, and the United Kingdom.

A key differentiator of Super Speciality Modern Homoeopathy is its integration of clinical pathology alongside traditional symptom-based diagnosis. Dr. Jain's has meticulously collected pre- and post-treatment test reports from over 3,000 successfully treated patients, along with their written testimonials and interviews, both online and offline. This substantial body of evidence aims to secure recognition for his treatment methodology within the broader medical community, ensuring future generations of homoeopathic practitioners can offer hope to patients who might otherwise remain hopeless.

Dr. Jain's innovative work continues to shape the future of homoeopathy providing a new path forward for both patients and healthcare providers worldwide.

Complete Cure, Permanent, Easy, Safe, Fast, Cost Effective.

Aarogya Super Specialty Modern Homoeopathy -

It is a modern medical science which incorporates the basic nature of homoeopathy and keeps it as its basis and includes many other new features.

Easy Method -

In Aarogya Super Speciality Modern Homoeopathy, a variety of homoeopathic medicines are utilized, including decimal potency, centesimal potency, 50 millesimal potency, mother tinctures, biochemic medicines, The method of administering these medicines is straightforward and can be easily followed in the prescribed dosage under the guidance of a qualified homoeopathic doctor. One of the unique aspects of Aarogya Super Speciality Modern Homoeopathy is that it does not work with the traditional restrictions often associated with homoeopathic treatment, such as avoiding strong-smelling substances during medication. Due to the high quality and potency of the medicines used, these minor misconceptions hold no relevance in this advanced system of treatment. This approach allows for effective treatment without the need for strict dietary restrictions, making it more accessible and easier for patients to adhere to. Aarogya Super Speciality Modern Homoeopathy excels in providing top-tier treatment with minimal medication, even for complex and difficult-to-treat conditions. In this system, various diseases are treated directly and comprehensively, whether through homoeopathic medicines alone or in combination with supportive medicines from other medical systems, depending on the patients condition and the nature of the disease. This holistic approach ensures that patients receive the most effective and personalized care

Harmless Medical Method -

One of the most remarkable aspects of Aarogya Super Speciality Modern Homoeopathy is its safety profile, even when high potencies are used. Unlike conventional treatments where the risk of side effects increases with the dosage of active ingredients, homoeopathic medicines are carefully prepared through a process called potentiation. In this process, the original substance is diluted while simultaneously increasing its potency. This unique method ensures that only a minimal amount of the chemical or raw material remains in the final product. As a result, Aarogya Super Speciality Modern Homoeopathy offers highly effective treatments without the risk of harmful side effects. The approach is practically unmatched in other branches of medical science, where larger doses of active substances can often lead to adverse reactions. In this way, modern homoeopathy provides a safe and natural healing method, making it an ideal option for individuals seeking a harmless yet potent solution to their health issues.

Fast Aggressive Treatment -

One of the most remarkable aspects of Aarogya Super Speciality Modern Homoeopathy is its fast and aggressive healing process, setting it apart from conventional homoeopathy. In this advanced system, medical expertise is combined with cutting-edge technology, including computerized software, to ensure rapid, accurate diagnosis and treatment. Doctors utilize a vast array of over 4,000 potent medicines, with strengths ranging from zero potency to an astonishing 50 lakh potency, making the treatment scientifically robust and effective for a wide range of diseases. The precision of this method allows doctors to quickly gather and analyze detailed information about a patients condition, helping them select the most suitable remedy. This tailored approach ensures that even severe, surgical, or seemingly incurable conditions are addressed efficiently and effectively. What makes this treatment truly revolutionary is its ability to provide fast relief without any side effects, transforming it into a powerful, unique, and highly reliable branch of medical science.

Complete cure of diseases from the root -

Aarogya Super Speciality Modern Homoeopathy aims to heal the patient completely body, mind, and soul ensuring not only recovery from current ailments but also preventing the recurrence of diseases throughout life. This holistic approach to treatment is a crucial aspect of any effective medical science.

This fast and aggressive treatment approach embodies the future of homoeopathy, offering hope to patients facing complex diseases while maintaining the core principles of safety, simplicity, and efficacy.

Cost-Effective Treatment with Aarogya Super Speciality Modern Homoeopathy

Despite its advanced and multifaceted approach, Aarogya Super Speciality Modern Homoeopathy remains highly affordable and accessible, making it a preferred choice for many. Compared to other medical systems, it offers a cost-effective solution while providing complete, safe, and test treatment. This affordability, combined with its ability to deliver immediate results without harmful side effects, has contributed to the growing global popularity of modern homoeopathy. Today, homoeopathy is trusted by millions, with affordable medicines available to those in need. Every fourth person in the world now benefits from homoeopathy in some form, relying on its holistic and comprehensive approach to healthcare.

Dr. Arpit Chopra Jain, M.D. in Homoeopathy and the inventor of Aarogya Super Speciality Modern - Homoeopathy, has been instrumental in making this revolutionary treatment accessible to people from all walks of life. His commitment to providing effective, affordable, and harmless treatment has redefined the landscape of healthcare, offering hope and healing to thousands.

Dr. Arpit Chopra (Jain)
 M.D. HOMOEOPATHY
 Inventor of Aarogya Super Speciality Modern Homoeopathy

Aarogya Super Speciality Modern Homoeopathy

Successful Treatment of Critical Health Conditions

Dr. Jain's innovative treatment method has shown exceptional results in managing and curing serious health conditions, including:

- Cancer
- Kidney Diseases
- Coma
- Blood Disorders such as sickle cell anemia and aplastic anemia
- Arthritis
- Autoimmune Diseases
- Neurological Disorders
- Heart Diseases
- Skin Conditions like psoriasis and dermatitis

Through a deep understanding of the body's internal balance, Aarogya Super Speciality Modern Homoeopathy targets the root causes of these diseases, promoting natural self-healing without the need for invasive procedures or lifelong medications.

Revolutionizing Disease Treatment

Aarogya Super Speciality Modern Homoeopathy, developed by Dr. Arpit Chopra Jain, has introduced a groundbreaking, holistic approach to treating a wide range of complex and chronic diseases. This method offers a comprehensive, harmless, cost-effective, and permanent solution, achieving remarkable success where conventional treatments often fall short.

Efficacy Across a Wide Range of Diseases

With a proven record of success in treating nearly 300 different diseases, Aarogya Super Speciality Modern Homoeopathy offers relief from conditions that affect various aspects of health. Patients suffering from:

- Allergies
- Womens Health Issues
- Urological and Gastric Problems
- Rheumatoid Arthritis
- Pediatric Conditions
- Spinal Cord Disorders

have all experienced life-changing results through this pioneering method.

A New Lease on Life

What truly sets this treatment apart is its ability to provide lasting and permanent relief. Patients who were previously dependent on lifelong medication or faced invasive surgeries have regained their health, returning to a normal, medication-free life. Aarogya Super Speciality Modern Homoeopathy continues to transform lives, offering a new, holistic approach for those suffering from complex and chronic diseases.

Acute Diseases

Aarogya Super Speciality Modern Homoeopathy gives immediate relief even in common diseases.

Common diseases or acute illnesses are something everyone experiences at some point. These conditions affect the function or structure of one or more organs or systems in the body, and they often present symptoms like headache, cough, diarrhea, or pus in a wound. While symptoms indicate that the body is facing a health issue, they don't always point to a specific disease for example, a headache could be caused by anything from stress to a serious condition like meningitis. Doctors use symptoms as clues, often recommending laboratory tests to pinpoint the exact cause of the illness.

These diseases can be life-threatening and are often difficult to manage with conventional treatments. Paediatricians can offer limited advice or treatments for such serious conditions, typically involving medications or even surgical interventions. However, Dr. Arpit Chopra **Jain's** Aarogya Super Speciality Modern Homoeopathy has proven to be highly effective in treating many of these complex paediatric diseases.

Serious diseases that can affect children and young adults include:

- Aplastic anemia
- Sickle cell anemia
- Blood cancer
- Spindle cell carcinoma
- Acute myeloid leukaemia (AML)
- Nephrotic syndrome
- Epilepsy
- Polycystic ovary disease (PCOD)
- Hypothyroidism
- Intestinal obstruction
- Muscular dystrophy
- Scrotal cysts
- Brain tumours
- Idiopathic thrombocytopenic purpura (ITP)

Many patients have shown significant improvement, and their pre- and post-treatment reports demonstrate the effectiveness of Dr. Arpit Chopra Jain's approach. His work provides hope for those suffering from complex paediatric diseases, showing that homoeopathy can offer permanent solutions even in cases where conventional medicine falls short.

Based on his 20 years of medical practice and research, Dr. Arpit Chopra Jain's has successfully treated numerous patients, from young children to teenagers, helping them recover fully from conditions that were once considered chronic or incurable. His modern homoeopathic treatments not only offer relief but also allow patients to live normal, healthy lives without ongoing dependence

COVID-19 CORONA

M writing msg as well 6:48 pm

Hello ..My name is Monika Sharma
Last month I have tested positive for covi
I contacted Dr Arpita Chopra & under his
supervision , I have started his medicines
under full Covid protocol.
I have tested negative & soar throat
problem also reduced after taking
medicines for 7 consecutive days.
I am very thankful to Dr Arpit ji

SARS-CoV-2 RT-PCR Test (Qualitative) (Rapid Test) Kit (PCR)

Test: Qualitative (RNA detection) of SARS-CoV-2 RT-PCR

Test principle: Real-time reverse transcription PCR (RT-PCR) amplification

Test description: Diagnostic kit for the detection and confirmation of SARS-CoV-2 RT-PCR

Result: SARS-CoV-2 (Qualitative) (Rapid Test) Kit (PCR)

CEM guidelines do not recommend self-dependence on RT-PCR for patient management.

The kit used for the SARS-CoV-2 RT-PCR test is Molecularly Proven to be 100% sensitive, 100% specific and 100% accurate. It is suitable for use in all laboratories. It is suitable for use in all laboratories. It is suitable for use in all laboratories.

We are providing our samples equipped of product which are recognized as equivalent to the standard laboratory tests. These tests are not government recognized as per the guidelines issued by ICMR and other as well as local government bodies.

Precaution: Since 1 sample against SARS-CoV-2 is sufficient to diagnose infection, the general approach of sample collection, handling, storage and disposal should be followed as per the guidelines issued by ICMR, WHO and other international organizations.

CEM registration no. MHT/2020/01

Precaution guidelines:

1. For health care workers (HCWs):
2. Do not touch the patient's nose, mouth, eyes, or other exposed areas.
3. Do not touch the patient's clothing.
4. If a person has any visible symptoms, they should wear a face mask and avoid contact with others for 5 days. If a person has any visible symptoms, they should wear a face mask and avoid contact with others for 5 days. If a person has any visible symptoms, they should wear a face mask and avoid contact with others for 5 days.
5. The kit should be used in a clean, dry, and well-ventilated area.
6. The kit should be used in a clean, dry, and well-ventilated area.
7. The kit should be used in a clean, dry, and well-ventilated area.
8. The kit should be used in a clean, dry, and well-ventilated area.
9. The kit should be used in a clean, dry, and well-ventilated area.
10. The kit should be used in a clean, dry, and well-ventilated area.

OSIS
0-19

Fresh onset of headache post Covid

Nasal or sinus congestion, Bleed lesions on upper inside of mouth

SIGNS TO WATCH OUT FOR

Facial pain

Doctors should avoid rampant use of steroids unless deemed life saving Covid

Threatening Infection

Mucormycosis or black fungus is being detected in Covid-19

diabetic or anyone who is immuno-compromore susceptible

exists as skin infection, spreads to eyes, lungs and brain

It leads to blackening of nose, affects vision

क्या है म्यूकोरमाइकोसिस?
इंडियन काउन्सिल ऑफ मेडिकल रिसर्च (आईसीएमआर) द्वारा जारी एडवाइजरी के अनुसार म्यूकोरमाइकोसिस फंगल इंफेक्शन है, जो शरीर में बहुत तेजी से फैलता है। म्यूकोरमाइकोसिस इंफेक्शन नाक, आंख, दिमाग, फेफड़े या फिर स्किन पर भी हो सकता है। इस बीमारी में कई लोगों की आंखों की रोशनी तक चली जाती है, वहीं कुछ मरीजों के जबड़े और नाक की हड्डी गल जाती है।

कोरोना के मरीजों को ज्यादा खतरा म्यूकोरमाइकोसिस आम तौर पर उन लोगों को तेज से अपना शिकार बनाता है, जिन लोगों में प्रतिरोधक क्षमता बहुत कम होती है। कोरोना के दौरान या फिर ठीक हो चुके मरीजों का इम्यून सिस्टम बहुत कमजोर होता है, इसलिए वह आसानी से इसकी चपेट में आ रहे हैं। खासतौर से कोरोना के जिन मरीजों को डायबिटीस **अगला आर्टिकल** > पर उनमें म्यूकोरमाइकोसिस खतरनाक रूप में फैल सकता है।

UJJAIN MRI & DIAGNOSTIC CENTRE

Pt. Name: MRS. KUSUM GADGVA
Ref. No: DR. T.S. CHOURDARY

Age/Sex: 66 Years /Female
Date: 17.05.2022

MRI PNS +CONTRAST

Technique: MRI of PNS is performed on high field 1.5 Tesla MRI system using head coil and various sequences including various sequences.

Imaging findings:

- Heterogeneous and peripherally enhancing mucosal thickening is seen in both maxillary sinuses, bilateral ethmoid sinuses (Right-Left) and right sphenoid sinus with heterogeneous signal intensity (predominantly hypointense on T2W sequence) contents and frothy secretions. Fungus is seen in both infundibula.
- Soft tissue edema is seen in premaxillary region. No evidence of edema is seen in infra-tentorial region or pterygoids. No mucosa edema is seen in pterygoid fossae.
- The nasal turbinates show heterogeneous enhancement with patchy non enhancing areas.
- Bilateral ostiomeatal complexes are normal.
- Rest of the paranasal sinuses appears normal. The sphenoidal and sphenoid-ethmoidal sinuses are patent. No evidence of intracranial ICH seen.
- Nasal septum is sigmoid shaped.
- Both middle ear cavities are normal.
- Impression: MRI PNS shows-
- Heterogeneous and peripherally enhancing mucosal thickening in both maxillary sinuses, bilateral ethmoid sinuses (Right-Left) and right sphenoid sinus with heterogeneous signal intensity (predominantly hypointense on T2W sequence) contents and frothy secretions. Fungus is seen in both infundibula.
- Soft tissue edema in premaxillary region.
- The nasal turbinates show heterogeneous enhancement with patchy non enhancing areas.

Imaging features are in favor of infective etiology, likely fungal.

DR. RAJESH KUMAR SHARMA
CONSULTANT RADIOLOGIST

Ruxmaniben Deepgupta
Ujjain Charitable Trust Hospital & Research
DEPARTMENT OF RADIOLOGY AND

Date: 17/05/22
Name: Mrs. Kusum Gadgva
Referred by: Dr. S. Yadav

C.T. Scan Examination of - **NCCT PNS WITH ORBIT**

REPORT

Technique: Coronal acquisition of images through the paranasal sinuses with post processing MPR's.

FINDINGS:

Mucosal hypertrophy in bilateral maxillary sinuses, low of ethmoid and partially obliterating the lumen and partial obliteration of the right ethmoid sinuses.

Nasal septum is mildly deviated towards left with small body sept.

Orbita bilaterally were normal.
Nasal turbinates appear normal.
Bilateral frontal sinuses are normal.
Osteomeatal units is patent on left side.
Bilateral sphenoid sinus and sphenoidal sinuses appear normal.
Bony walls of the sinuses are intact. No calcification.
Bilateral cerebellum planes and visualized cisterns appear normal.
Normal meningeophyseal cistern seen.
No abnormal paranasal signal intensity is seen along the course of the optic chiasmatic pathway.
No obvious abnormality seen in the retro-orbital space.
The extra-orbital structures appear normal.
Ilio, ilio and post-orbital structures appear normal.

DISCUSSION: NCCT PNS shows-

- Mucosal hypertrophy in bilateral maxillary sinuses, low of ethmoid and partially obliterating the lumen and partial obliteration of ethmoid sinuses.
- Nasal septum is mildly deviated towards left with small body sept.
- No obvious abnormality is seen along the retro-orbital pathway.

For further clinical correlation.

Sahil Icham
Mob. No. 9982775330
Bilalmechmoodehan@gmail.com

I was suffering from chronic ear discharge or otorrhoea since birth. I took a lot of treatment from many doctors and no surgery and hope received anywhere through all test was normal. But in Aarogya Super speciality modern Homoeopathic clinic computerised under treatment of critical case specialist & MD homoeopath Dr. Arpit Chopra this problem got cured only in one & half month only, which was unbelievable but true, really. I sincerely recommend it.

Thank you Sir.

Mucormycosis

Mucormycosis, also known as black fungus, is a severe fungal infection that affects people who are immunocompromised. It's caused by spores from mucormycetes, a common environmental mold. While most people encounter mucormycetes daily without getting sick, those with certain conditions or taking medications that weaken their immune system are at risk. Early diagnosis and prompt treatment with antifungal medication are crucial for improving patient outcomes.

 (Sodani Hospitals & Diagnostics Pvt. Ltd.)

MEDICAL REPORT

Patient Name: **MR. KAJIM ANSARI** Birthdate: 27/05/1985
 DOB/Age/Sex: 38 years/Male Registered: 14/05/2024, 04:37 p.m.
 Mobile: 9077211177 Collected On: 14/05/2024, 04:37 p.m.
 Referred By: Dr. Chetan Sarvakar (MD) Received On: 14/05/2024, 04:37 p.m.
 Occupation: NA Approved On: 14/05/2024, 11:46 a.m.

128 SLICE MDCT PNS

Technique:
 A Non contrast contrast CT scan of PNS was performed.

Clinical Details: Previous imaging done at other center in May & June 2024 suggestive of fungal osteomyelitis involving anterior nasal skull base & ICR maxilla / hard palate with mild intra-orbital extension.

Imaging Findings:
 Present scan shows marked lytic bony destruction with central ulceration & cortical erosions at multiple places involving alveolar margin of left maxilla, all walls of left maxillary sinus, hard palate & left inferior zygomatic bone.

Significant reduction in the surrounding soft tissue component noted with small residual soft tissue seen in the region of pre-maxillary fat & orbital apex bow.

Moderate mucosal thickening with partial opacification also seen in both maxillary sinuses with blocked both OMCS.

Mild residual mucosal thickening seen in few of the left anterior ethmoidal air cells, left frontal sinuses and right sphenoid sinus.

The nasal septum is deviated towards right with small bow nasal septal spur.

Rest frontal sinuses are normal.
 Rest ethmoidal air cells appear normal.
 Rest sphenoid sinuses appear normal.
 The olfactory fossa are Kerley type I.
 The visualized nasopharyngeal air way appears remarkable.
 Still seen enlarged left superior ophthalmic vein likely due to thrombosis.

Page 1 of 1

Sodani Imaging Centre
 1.5T MRI (16 Channels) 16 Slice MDCT

NAME: **KAJIM S ANSARI** M/38YRS DATE: 10/06/2024

REF BY: **DR. IBU** **Before Treatment**

MSCT SCAN OF PNS:
 MDCT imaging was performed using sublethal water the contiguous plain coronal scan of paranasal sinuses. Bony window images were obtained.

Marked mucosal thickening seen in left maxillary, all left ethmoidal, both sphenoid and right frontal sinus.

Marked bony erosion with bony destruction seen involving all walls of left maxillary sinus, left zygomatic arch, left greater wing of sphenoid, floor and medial wall of left orbit, entire left hard bony palate-osteomyelitis.

Largely soft tissue seen in left retro-maxillary antral fat, pterygomaxillary fossa and infratemporal fossa.

Small soft tissue also seen in floor of left orbital apex without involvement of optic nerve.

Right orbit appears normal.

Rest of paranasal sinuses appear clear.

Mild enlarged left superior ophthalmic vein seen—concerned for thrombosis.

IMPRESSION:
 • Imaging appearances may represent fungal etiology / mucormycosis.

MRI brain, orbit and PNS recommended for better evaluation.

MRI BRAIN + ORBITS WITH CONTRAST

Technique:
 Routine sequences with post-contrast T1 sequences were acquired in multiple planes, to evaluate the brain. Thin sections including T1 T2/STIR and post-contrast T1 sequences were obtained through coronal slices and the slices.

Imaging Findings:
Before Treatment

There is evidence of heterogeneous intermediate to T2 hypointense signal lesion seen replacing the marrow of the left greater wing of sphenoid with continuous soft tissue extension, also involving the anterior and posterolateral walls of the maxillary sinus. Complete opacification of the left maxillary sinus is noted with heterogeneous T2 hypointense contents inferiorly, in the region of the left hard palate and maxillary alveolus. Associated T2 hypointense soft tissue, showing heterogeneous enhancement and restriction of diffusion seen at the junction of the body and greater wing of sphenoid to the left, extending into the left Meckel's cave, minimally into the left cavernous sinus. Anteriorization of the left foramen ovale and V3 segment of the trigeminal nerve is noted. Peripheral enhancement is seen involving the soft maxillary sinus and left maxillary alveolus. Hard palate the heterogeneous T2 hypointense thickening involving the retro-orbital fat, the pterygomaxillary fossa, pterygospinal foramen reaching in to the inferior orbital fissure. Adjacent to the inferior orbital fissure, linear enhancing thickening is seen in the supra-medial aspect of the left orbit, involving the intracanalicular and extracanalicular components, closely abutting the left optic nerve along its superior and lateral aspect. The left optic nerve, however, shows normal signal without any abnormal signal or contrast enhancement. No restriction of diffusion is seen in the left optic nerve involving the intracanalicular component of the right optic chiasm. The intracanalicular component measures approximately about 5 mm CC & 6 mm transverse into the AP in size.

Complementary CT cuts shows extensive destructive erosion and destruction of the hard palate, left maxillary alveolus and the left greater wing of sphenoid, and minimally left lateral wall of the sphenoid sinus is noted.

Mild involvement of the left infratemporal fossa is noted, with involvement of the superior most fibres of the left temporalis muscle.

The brain parenchyma and ventricular systems appear normal. Brain stem & cerebellum appear normal.

DIFFICULTY SWALLOWING (DYSPHAGIA)

Difficulty swallowing

Also called: Dysphagia

Overview

Treatments

Difficulty swallowing foods or liquids, arising from the throat or oesophagus, ranging from mild difficulty to complete and painful blockage.

COMMON CAUSES

Difficulty swallowing can have causes that aren't due to underlying disease. Examples include large bites of food, inadequate chewing, dry mouth, pills or food that's too hot

COVID-19 CORONAVIRUS

क्या है कोरोना वायरस

कैसे फैलता है ?

- इंसानों के जानवरों के संपर्क में आने पर
- खांसने, छींकने, हाथ छिलाने से

इंसान संभव है ?

- आ तक कोई वैसीन इंजाब नहीं

कहाँ से आता वायरस

- चीन के वुहान में पहला केस

WHO की संस्था

- हाथ धोएं
- मांस खाने से बचें
- खांसते-छींकते मुँह ढकें

व्यापकता

- एशिया
- उत्तर अमेरिका
- यूरोप
- दक्षिण अमेरिका
- ऑस्ट्रेलिया
- अफ्रीका

संकेत

- ज्वर
- सर्दी
- बुखार
- कई दिनों तक रहने वाला बुखार
- कई दिनों तक रहने वाला बुखार
- कई दिनों तक रहने वाला बुखार
- कई दिनों तक रहने वाला बुखार

परीक्षण

- परीक्षण के दौरान में पैराने वाला वायरस

COVID-19 affects different people in different ways. Most infected people will develop mild to moderate illness and recover without hospitalization.

Most common symptoms:

- fever
- dry cough
- tiredness

Less common symptoms:

- aches and pain
- sore throat
- diarrhea
- conjunctivitis
- headache
- loss of taste or smell
- a rash or skin, or discoloration of fingers or toes

Test Name	Results	Units	Bio. Ref. Interval
COVID-19 VIRUS QUALITATIVE REAL TIME RT-PCR (Ct) (N, ORF, E)	NEGATIVE		
Testing Kit Used	Met		Negative OR Positive

Note :-
1. QR Code Registration number for Ct tests kit is QR141
2. Negative result does not rule out the possibility of COVID-19 infection. Presence of respiratory symptoms & influenza like illness that persist for more than 7 days, usually warrants a repeat sample result for confirmation. However, in such cases a repeat sample result for confirmation is not necessary, but results have to be confirmed with a repeat sample result for confirmation.
3. Clinical history and progression help in diagnosis.
4. Clinical RT-PCR conducted as per WHO approved by ICMR, ICMR, ICMR, ICMR.
5. Strictly avoid self-referral. Patients to be referred by registered medical practitioners only.
6. Test conducted on Nasopharyngeal & Oropharyngeal Swabs.
7. Ct Value threshold value is defined as the number of cycles required for the fluorescence signal to cross threshold. Lower the Ct value, higher the viral load in the specimen. There are no reliable studies to definitively prove a direct correlation between disease severity, infectiousness and Ct value. Therefore, the Ct value should not be used as a sole criterion for patient management. However, Ct value should be used as a guide to monitor the progression of the disease. Ct value should not be used as a sole criterion for patient management.
8. Only on commercial RT-PCR kit for the determination of infectiousness of COVID-19 patients for returning public transportation.

COVID-19 affects different people in different ways. Most infected people will develop mild to moderate illness and recover without hospitalization.

Most common symptoms:

- fever
- dry cough
- tiredness

Less common symptoms:

- aches and pains
- sore throat
- diarrhoea
- conjunctivitis
- headache
- loss of taste or smell
- a rash on skin, or discolouration of fingers or toes

 Referred By: N.A Client Name: mahadev health care service
 Collection Date: 04-09-2020 11:37:00 Report Release Date: 04-09-2020

Sr.No	Investigation	Observed Value	Reference Range	Unit
1	COVID ANTIBODIES-TOTAL Serum, Method: CLIA	5.51	Negative: <1 Positive: >=1	cutoff index

Interpretation
 1. Positive results means positive for Covid-19 antibodies and possibility of past exposure or presumed immunity.
 2. Negative results means Negative for Covid-19 antibodies and possibility of no exposure to the virus, however the test result does not rule out the possibility of Covid-19 infection.

Central Diagnostics Lifecare Pvt. Ltd.
 House, Plot No. 6, Sec-24, Navi Mumbai-400705, Phone No: 022-4045-0000

Name: mr bhupendra vani Age/Gender: 32 Year(s) 0 Month(s) 0 Day(s)/Male

Sr.No	Investigation	Observed Value	Reference Range	Unit
1	C - Reactive Protein Serum, Method: Nephelometry	8.34	0.1 - 5.0	mg/dL

Interpretation
 C-reactive protein (CRP) is one of the most sensitive acute-phase reactants for inflammation. Measuring changes in the concentration of CRP provides useful diagnostic information about the level of acuity and severity of a disease. It also allows judgments about the disease genesis. Persistence of a high serum CRP concentration is usually a grave prognostic sign that generally indicates the presence of an uncontrolled infection.
 In normal healthy individuals, C-reactive protein (CRP) is a trace protein (<5 mg/L). Elevated values are consistent with

Test Name	Results	Units	Bio. Ref. Interval
COVID-19 VIRUS QUALITATIVE REAL TIME RT-PCR [ICMR REG. NO. CL IMP]	Positive		Negative OR Positive
COVID-19 RT PCR	Positive		Negative OR Positive
E Gene/N Gene	22.04		
ORF1a/ORF1b/NIN2 Gene	22.24		
Testing Kit Used	Meril		

Notes:-

- ICMR Registration number for Covid-19 is CLIMP.
- Negative result does not rule out the possibility of Covid-19 infection. Presence of inhibitors, mutations & insufficient RNA specific to SARS-CoV-2 can influence the test result. Kindly correlate the results with clinical findings. A negative result in a single upper respiratory tract sample does not rule out SARS-CoV-2 infection. Hence in such cases a repeat sample should be sent. Lower respiratory tract samples like Sputum, BAL, ET aspirate are appropriate samples especially in severe and progressive lung disease.
- Covid-19 Test conducted as per kits approved by ICMR / CE-ND / USFDA.
- Kindly consult referring Physician / Authorized hospitals for appropriate followup.
- Test conducted on Nasopharyngeal & Oropharyngeal Swabs.
- Ct (Cycle threshold) Value is defined as the number of cycles required for the fluorescent signal to cross threshold. Lower the Ct value higher is the viral load. There are no reliable studies to definitively prove a direct correlation between disease severity, infectiousness and Ct values. Viral load does not have much role in patient management. Samples from asymptomatic cases show Ct values similar to those who develop severe disease. Patients in early symptomatic stage may show a high Ct value which may subsequently change. In such cases, high Ct values will give a false sense of security. ICMR does not recommend to rely on numerical Ct values for determining infectiousness of COVID-19 patients and deciding patient management protocols.

Comments:-

Coronaviruses (CoV) are a large family of viruses that cause illness ranging from the common cold to more severe diseases such as Middle East Respiratory Syndrome (MERS-CoV) and Severe Acute Respiratory Syndrome (SARS-CoV). Coronavirus disease (COVID-19) is a new strain that was discovered in 2019 and has not been previously identified in humans. Common signs of infection include respiratory symptoms, fever, cough, shortness of breath and breathing difficulties. In more severe cases, infection can cause pneumonia, severe acute respiratory syndrome and kidney failure.

MOLECULAR BIOLOGY
COVID-19 QUALITATIVE REAL TIME PCR

Sample Type: NASOPHARYNGEAL & OROPHARYNGEAL SWAB
Sampling Date: 30.04.2021
SARS-COV-2 RNA QUALITATIVE Target Gene: N GENE, ORF1AB GENE

Result: NEGATIVE

Test Method: Real Time Reverse Transcription Polymerase Chain Reaction (Open System)
The test is performed using assays approved by ICMR/FDA / CE-ND and following ICMR advisories.

SARS CoV 2 is the causative agent for coronavirus disease 2019 or COVID-19 in Humans. The common signs of COVID-19 infection include respiratory symptoms, fever, cough, shortness of breath and breathing difficulties. In more severe cases, infection can cause pneumonia, severe acute respiratory syndrome, kidney failure and even death.

NOTE:

- ICMR Registration Number SSDC001
- Positive amplification of two target genes shall be considered as positive of SARS-COV-2.
- Presence of PCR inhibitors, viral load lesser than the assay lower limit of detection or presence of rare genotypes or mutations may result in false-negative report.
- A single negative test result from an upper respiratory tract specimen does not exclude infection. Repeat sampling & testing of lower respiratory specimen is strongly recommended for severe or progressive disease.

Service Project Infrastructure: Making Medical Care Accessible to All

"Medical facilities should be accessible to the common man in every way." Dr. Arpit Chopra Jain

To make his groundbreaking medical invention available to the general public, Professor Dr. Arpit Chopra Jain has established the Aarogya Super Speciality - Modern Homoeopathy Clinic, equipped with state-of-the-art facilities, at Janjirwala intersection in the heart of Indore city. At this clinic, patients have access to comprehensive consultation, diagnosis, and treatment for various diseases, all under one roof.

In addition, a dedicated consultation room for online patients has been set up to offer virtual consultations. Medicines are delivered through courier services, ensuring that even the most serious conditions can be treated from the comfort of one's home. Dr. Arpit Chopra Jain's initiative ensures that high-quality healthcare is not just limited to in-person visits but is also accessible to those in distant locations.

Dr. Arpit Chopra Jain: A Commitment to Service and Responsibility

Dr. Arpit Chopra Jain, raised in a family of doctors, embodies the true essence of a dedicated medical professional. With a deep sense of responsibility toward human welfare, he has revolutionized healthcare through his groundbreaking invention of Super Speciality Modern Homoeopathy treatment. His work has provided a new direction in treating complex diseases, ensuring that even those who once felt hopeless have found relief.

campaign to combat sickle cell anemia, Dr. Arpit Chopra Jain is also working tirelessly in tribal areas. His efforts contribute significantly to the permanent and successful treatment of this genetic disorder, further reflecting his unwavering commitment to the welfare of humanity.

Dr. Arpit Chopra Jain also organizes medical camps aimed at diagnosing complex diseases, providing free consultations to those in need. His sense of duty was especially evident during the devastating COVID-19 pandemic, where he took extraordinary measures to help his community. Understanding the gravity of the situation, he distributed free Corona prevention medicines to approximately 2,25,000 people, including Corona Warriors, potentially saving many lives.

Dr. Arpit Chopra Jain exemplifies what it means to be a physician who balances medical practice with social responsibility, continuing to make a profound impact on both individual lives and society as a whole.

Recognizing the significance of his role, Dr. Arpit Chopra Jain extends his responsibilities beyond medical practice. He considers it his moral and national duty to contribute to various social service activities. Along with treating complicated medical conditions, Dr. Arpit Chopra Jain is committed to shaping the future of homoeopathy. He actively mentors and educates new students entering the field, helping them gain the knowledge necessary to advance in medical science.

Samman Awards: A Tribute to Responsibility and Service

"Respect received from society increases responsibility." Dr. Arpit Chopra Jain

Dr. Arpit Chopra Jain believes that when one contributes responsibly and at the right time, society offers its respect. However, with that respect comes an even greater sense of responsibility.

Dr. Arpit Chopra Jain, through his groundbreaking invention of the Arogya Super Speciality Modern Homoeopathy medical system and his numerous social contributions, has garnered widespread recognition.
