AAROGYA SUPER SPECIALITY MODERN HOMEOPATHY**

COMPLETE, EASY SAFE, FAST & COST-EFFECTIVE CURE

Dr. Arpit Chopra Jain M.D Homeopath

Critical and Surgical Disease Specialist

Dr. Arpit Chopra Jain: Transforming Global Healthcare with Aarogya super Speciality Modern Homeopathy.

Dr. Arpit Chopra Jain, a pioneer in advanced homeopathic medicine, is set to present groundbreaking clinical data comprising over 3,000 successfully treated cases of critical and surgical diseases — all cured without the need for surgery. This revolutionary treatment approach, developed and practiced exclusively by Dr. Jain, utilizes high-potency homeopathic medicines formulated by him, offering fast, safe, and side-effect-free results.

With over 21 years of experience, Dr. Jain has dedicated his life to providing an alternative yet powerful medical solution that not only preserves the body's original organs but also ensures deep, lasting cures. **His work has gained national and international recognition. He has been honored by India's Vice President, Defense Minister Shri Rajnath Singh, Health Minister Shri J. P. Nadda, and several other dignitaries.** In acknowledgment of his contributions, he has also received a prestigious honorary doctorate from the USA.

Dr. Arpit Chopra Jain proudly represents India on the international stage as the **Homeopathic Representative for BRICS (Russia)** and continues to raise the global profile of homeopathy through his one-of-a-kind center based in Indore, Madhya Pradesh, India. From this single center, he has reached and treated patients from over 19 countries, offering remote consultations and delivering life-changing results globally.

Recently, **Dr. Jain was invited as the Guest of Honor at the highly esteemed United Nations Global Excellence Awards held at the UN Headquarters in New York, hosted by the United Nations Global Peace Council.** This momentous occasion was a testimony to his relentless commitment and global vision for homeopathy.

His work is supported by real, verifiable patient testimonials, including pre- and post-treatment reports, available on his official website and YouTube channel. These authentic stories reflect the effectiveness and rapid healing power of his treatment.

This book is a humble attempt to introduce Dr. Jain's extraordinary journey and his mission — to make the world healthier without surgery, promoting natural healing through scientifically advanced homeopathic medicine. His goal is to create a safer, more cost-effective, and organ-preserving healthcare alternative for patients across the globe.

The identity of any person is his real wealth.

INTRODUCTION

Inventor of Aarogya Super Speciality Modern Homoeopathy, revolutionized treatment for complex diseases

Professor Dr. Arpit Chopra Jain

Professor Dr. **Arpit Chopra Jain**, with over 20 years of medical experience and research, has revolutionized classical homeopathy by developing a future-oriented, super-speciality modern homoeopathy treatment system. His innovative approach has given new physical, mental, and social life to thousands of patients who were once considered incurable, including those suffering from nearly 300 different diseases such as cancer, kidney failure, coma, aplastic anemia, and other serious conditions requiring surgical intervention. In doing so, he has also fulfilled the World Health Organizations (WHO) belief that true health encompasses physical, mental, and social well-being.

Originally from Chhattisgarh, Dr. Arpit Chopra Jain received his primary education in his home state before moving to Indore to pursue a Bachelors degree in Homeopathy. After completing his BHMS, he earned an MD in Homeopathy from DKMM Homoeopathic Medical College in Aurangabad, Maharashtra. During his studies and career, he worked alongside many renowned allopathic doctors in Indore and other locations, acquire practical experience and contributing to medical advancements.

Currently, Dr. Arpit Chopra Jain is providing medical services through the Aarogya Super Speciality Modern Homoeopathy Clinic, located at Janjirwala Square in Indore, where he leads a team of experienced professionals. In addition to his clinical work, Dr. Arpit Chopra Jain plays a pivotal role in shaping homeopathic education as an educator at RN Kapoor Homoeopathic Medical College. His research focuses on complex blood-related diseases, including aplastic anemia and sickle cell anemia.. Driven by a commitment to innovation, Dr. Jain has been nationally and internationally recognized for his groundbreaking contributions to the treatment of complex and incurable diseases. His exceptional service during the COVID-19 pandemic further highlights his dedication to advancing modern homeopathic medicine.

Many of Dr. Arpit Chopra Jain's patients regard him as a godsend, praising his unwavering commitment to serving humanity. Beyond his medical practice, Dr. Arpit Chopra Jain, who hails from a family of 19 physicians, is making significant contributions to society and the Nation.

He firmly believes that Aarogya Super Speciality Modern Homoeopathy - instant, effective, affordable, and without side effects is the future of homoeopathy. While homoeopathy may have originated in Germany, Dr. Arpit Chopra Jain is confident that India's revolutionary modern homoeopathic medical system will one day be recognized globally, inscribing India's name in golden letters on the world health chart. He and his team are making every possible effort to achieve this vision and will continue to do so.

Golden India's Revolutionary Discovery: Pioneering the Future of Healthcare with Advanced Homoeopathy

Homoeopathy, a system of alternative medicine established over 200 years ago by German physician Dr. Samuel Hahnemann, has experienced widespread adoption across various countries, including India. However, over time, it faced criticism and was even banned in certain regions due to persistent myths and misconceptions, such as its alleged placebo effect. Critics claimed that homoeopathic remedies were ineffective, slow to act, and not backed by scientific evidence, leading to widespread skepticism among both the public and the scientific community.

One significant issue was that classical homoeopathy relied heavily on treating patients based on symptoms alone, without extensive clinical documentation or diagnostic reports. This absence of empirical evidence made it challenging to validate its effectiveness through conventional medical research methods.

In response to these challenges, Dr. Hahnemann later developed a more potent form of homoeopathic medicine, known as the 50 millesimal potency, or 5 million power. However, by the time this advancement was introduced, classical homoeopathy had already established deep roots, and the lack of continued research, documentation, and clinical validation led to its gradual decline in some regions.

Recognizing the need to address these limitations, Professor Dr. Arpit Chopra Jain, with over 20 years of clinical and hospital experience, pioneered a groundbreaking approach known as Super Speciality Modern homoeopathy Utilizing the powerful 50 lakh potency homoeopathic medicines, along with mother tinctures, biochemic treatments, and dilutions, Dr. Jain's revolutionized the practice by effectively treating severe autoimmune conditions, including cancer, kidney failure, aplastic anemia, sickle cell anemia, rheumatoid arthritis, ankylosing spondylitis, and many other life-threatening illnesses. This innovative treatment approach has produced remarkable results, enabling patients suffering from complex and incurable diseases to recover without any side effects or lifelong medication dependency. Dr. Jain's method has proven particularly effective in cases previously deemed untreatable, such as patients in comas, those with brain tumors, or those in the terminal stages of illness.

His success extends beyond India, benefitting patients in countries such as Pakistan, Dubai, Bangladesh, the United States, and the United Kingdom.

A key differentiator of Super Speciality Modern Homoeopathy is its integration of clinical pathology alongside traditional symptom-based diagnosis. Dr. Jain's has meticulously collected pre- and post-treatment test reports from over 3,000 successfully treated patients, along with their written testimonials and interviews, both online and offline. This substantial body of evidence aims to secure recognition for his treatment methodology within the broader medical community, ensuring future generations of homoeopathic practitioners can offer hope to patients who might otherwise remain hopeless.

Dr. Jain's innovative work continues to shape the future of homoeopathy providing a new path forward for both patients and healthcare providers worldwide.

Complete Cure, Permanent, Easy, Safe, Fast, Cost Effective.

Aarogya Super Specialty Modern Homoeopathy -

It is a modern medical science which incorporates the basic nature of homoeopathy and keeps it as its basis and includes many other new features.

Easy Method -

In Aarogya Super Speciality Modern Homoeopathy, a variety of homoeopathic medicines are utilized, including decimal potency, centesimal potency, 50 millesimal potency, mother tinctures, biochemic medicines, The method of administering these medicines is straightforward and can be easily followed in the prescribed dosage under the guidance of a qualified homoeopathic doctor. One of the unique aspects of Aarogya Super Speciality Modern Homoeopathy is that it does not work with the traditional restrictions often associated with homoeopathic treatment, such as avoiding strong-smelling substances during medication. Due to the high quality and potency of the medicines used, these minor misconceptions hold no relevance in this advanced system of treatment. This approach allows for effective treatment without the need for strict dietary restrictions, making it more accessible and easier for patients to adhere to. Aarogya Super Speciality Modern Homoeopathy excels in providing top-tier treatment with minimal medication, even for complex and difficult-to-treat conditions. In this system, various diseases are treated directly and comprehensively, whether through homoeopathic medicines alone or in combination with supportive medicines from other medical systems, depending on the patients condition and the nature of the disease. This holistic approach ensures that patients receive the most effective and personalized care

Harmless Medical Method -

One of the most remarkable aspects of Aarogya Super Speciality Modern Homoeopathy is its safety profile, even when high potencies are used. Unlike conventional treatments where the risk of side effects increases with the dosage of active ingredients, homoeopathic medicines are carefully prepared through a process called potentiation. In this process, the original substance is diluted while simultaneously increasing its potency. This unique method ensures that only a minimal amount of the chemical or raw material remains in the final product. As a result, Aarogya Super Speciality Modern Homoeopathy offers highly effective treatments without the risk of harmful side effects. The approach is practically unmatched in other branches of medical science, where larger doses of active substances can often lead to adverse reactions. In this way, modern homoeopathy provides a safe and natural healing method, making it an ideal option for individuals seeking a harmless yet potent solution to their health issues.

Fast Aggressive Treatment -

One of the most remarkable aspects of Aarogya Super Speciality Modern Homoeopathy is its fast and aggressive healing process, setting it apart from conventional homoeopathy. In this advanced system, medical expertise is combined with cutting-edge technology, including computerized software, to ensure rapid, accurate diagnosis and treatment. Doctors utilize a vast array of over 4,000 potent medicines, with strengths ranging from zero potency to an astonishing 50 lakh potency, making the treatment scientifically robust and effective for a wide range of diseases. The precision of this method allows doctors to quickly gather and analyze detailed information about a patients condition, helping them select the most suitable remedy. This tailored approach ensures that even severe, surgical, or seemingly incurable conditions are addressed efficiently and effectively. What makes this treatment truly revolutionary is its ability to provide fast relief without any side effects, transforming it into a powerful, unique, and highly reliable branch of medical science.

Complete cure of diseases from the root -

Aarogya Super Speciality Modern Homoeopathy aims to heal the patient completely body, mind, and soul ensuring not only recovery from current ailments but also preventing the recurrence of diseases throughout life. This holistic approach to treatment is a crucial aspect of any effective medical science.

This fast and aggressive treatment approach embodies the future of homoeopathy, offering hope to patients facing complex diseases while maintaining the core principles of safety, simplicity, and efficacy.

Cost-Effective Treatment with Aarogya Super Speciality Modern Homoeopathy

Despite its advanced and multifaceted approach, Aarogya Super Speciality Modern Homoeopathy remains highly affordable and accessible, making it a preferred choice for many. Compared to other medical systems, it offers a cost-effective solution while providing complete, safe, and test treatment. This affordability, combined with its ability to deliver immediate results without harmful side effects, has contributed to the growing global popularity of modern homoeopathy. Today, homoeopathy is trusted by millions, with affordable medicines available to those in need. Every fourth person in the world now benefits from homoeopathy in some form, relying on its holistic and comprehensive approach to healthcare.

Dr. Arpit Chopra Jain, M.D. in Homoeopathy and the inventor of Aarogya Super Speciality Modern - Homoeopathy, has been instrumental in making this revolutionary treatment accessible to people from all walks of life. His commitment to providing effective, affordable, and harmless treatment has redefined the landscape of healthcare, offering hope and healing to thousands.

Dr. Arpit Chopra (Jain)
 M.D. HOMOEOPATHY
 Inventor of Aarogya Super Speciality Modern Homoeopathy

Aarogya Super Speciality Modern Homoeopathy

Successful Treatment of Critical Health Conditions

Dr. Jain's innovative treatment method has shown exceptional results in managing and curing serious health conditions, including:

- Cancer
- Kidney Diseases
- Coma
- Blood Disorders such as sickle cell anemia and aplastic anemia
- Arthritis
- Autoimmune Diseases
- Neurological Disorders
- Heart Diseases
- Skin Conditions like psoriasis and dermatitis

Through a deep understanding of the body's internal balance, Aarogya Super Speciality Modern Homoeopathy targets the root causes of these diseases, promoting natural self-healing without the need for invasive procedures or lifelong medications.

Revolutionizing Disease Treatment

Aarogya Super Speciality Modern Homoeopathy, developed by Dr. Arpit Chopra Jain, has introduced a groundbreaking, holistic approach to treating a wide range of complex and chronic diseases. This method offers a comprehensive, harmless, cost-effective, and permanent solution, achieving remarkable success where conventional treatments often fall short.

Efficacy Across a Wide Range of Diseases

With a proven record of success in treating nearly 300 different diseases, Aarogya Super Speciality Modern Homoeopathy offers relief from conditions that affect various aspects of health. Patients suffering from:

- Allergies
- Womens Health Issues
- Urological and Gastric Problems
- Rheumatoid Arthritis
- Pediatric Conditions
- Spinal Cord Disorders

have all experienced life-changing results through this pioneering method.

A New Lease on Life

What truly sets this treatment apart is its ability to provide lasting and permanent relief. Patients who were previously dependent on lifelong medication or faced invasive surgeries have regained their health, returning to a normal, medication-free life. Aarogya Super Speciality Modern Homoeopathy continues to transform lives, offering a new, holistic approach for those suffering from complex and chronic diseases.

A life dependent on medicines hinders a person from becoming self-reliant.

Many modern-day ailments stem from lifestyle choices, leading to chronic conditions that require lifelong medication in conventional treatment systems such as allopathy. Diseases like hypothyroidism, diabetes, hypertension, migraine, epilepsy, PCOD (Polycystic Ovarian Disease), and dyslipidaemia are common examples where patients often face lifelong drug dependency due to the absence of a permanent cure in these medical approaches.

This dependence on medication limits a person's ability to live independently, as constant reliance on drugs becomes necessary to manage symptoms. However, Dr. Arpit Chopra Jain, a renowned specialist in homoeopathy based in Indore, Madhya Pradesh, has dedicated over two decades to developing a Aarogya Super Speciality Modern Homoeopathy system. His approach aims to provide permanent solutions for many such chronic and complex diseases that are typically labelled as incurable by other medical systems.

Through his research and clinical practice, Dr. Arpit Chopra Jain has successfully treated numerous patients suffering from conditions deemed hopeless by conventional medicine. His treatment has allowed these individuals to regain their health and live without the need for lifelong medication. His work underscores the potential of alternative medical systems like Super Speciality Modern Homoeopathy in offering a path to healing that restores self-reliance and quality of life.

Hypothyroidism
 Also called: underactive thyroid

OVERVIEW SYMPTOMS TREATMENTS NEWS

A condition in which the thyroid gland doesn't produce enough thyroid hormone.

Hypothyroidism's deficiency of thyroid hormones can disrupt such things as heart rate, body temperature and all aspects of metabolism. Hypothyroidism is most prevalent in older women.

Very common

Type 2 diabetes

Also called: adult onset diabetes

OVERVIEW SYMPTOMS TREATMENTS

Pancreas can't make enough insulin

Lancet to test blood-sugar levels

A chronic condition that affects the way the body processes blood sugar (glucose).

Very common

More than 10 million cases per year (India)

- Treatable by a medical professional
- Requires a medical diagnosis
- Lab tests or imaging always required
- Chronic: can last for years or be lifelong

Investigation	Observed Value	Unit	Biological Reference Interval
CRP - C Reactive Protein* (non-inflammatory)	1.37	mg/L	<= 6.0

Interpretation

- Measurement of CRP is useful for the detection and evaluation of infection, tissue injury, inflammatory disorders and associated diseases.
- High sensitivity CRP (hsCRP) measurements may be used as an independent risk marker for the identification of individual at risk for future cardiovascular disease.
- Increase in CRP values are non-specific and should not be interpreted without a complete history.

Widal Test for Typhoid Serum*

Salmonella Typhi - 'O' Antigen Agglutination: 1:80 No Agglutination
Salmonella Typhi - 'H' Antigen Agglutination: 1:160 No Agglutination
Salmonella Paratyphi - A - H Antigen No Agglutination No Agglutination
Salmonella Paratyphi B - H Antigen No Agglutination No Agglutination

O antigen Agglutination titre	H antigen Agglutination titre	Interpretation
No agglutination	Low titre < 100	Agglutination reactions/weak agglutination
Low titre < 80	No agglutination	Agglutination reactions/weak agglutination
Low titre < 80	Low titre < 100	Confirm rise in titre with repeat specimen after 2-3 weeks
<= 80	No agglutination	Suggestive of Enteric fever
No agglutination	>= 160, any one of either SH, STA or STB antigen	Suggestive of Enteric fever
<= 160	>= 100, any one of either SH, STA or STB antigen	Strongly indicates Enteric fever
Agglutination preliminary titre	Agglutination (any titre), more than one of SH, STA or STB antigen types	Strongly indicates Enteric fever

- For O antigen, titre of 80 or above can be significant
- For H antigen, titre of 160 or above are considered significant.
- Demonstration of rising titre in paired sera is confirmatory.
- SH=O typhi, STA=O paratyphi A, STB=O paratyphi B

Hyperthyroidism

Also called: overactive thyroid

Overview

Symptoms

Treatments

The overproduction of a hormone by the butterfly shaped gland in the neck (thyroid).

Hyperthyroidism is the production of too much thyroxine hormone. It can increase metabolism.

SYMPTOMS

- MENSTRUAL CHANGES
- FATIGUE
- DIARRHEA
- SWEATING
- SENSITIVITY TO HEAT
- INSOMNIA
- TACHYCARDIA
- WEIGHT LOSS
- IRRITABILITY

OVERACTIVE THYROID (HYPERTHYROIDISM)

Learn more about all these symptoms, why they will not be treated properly, how to get rid of them, and how to prevent them.

 Sample Collected At: ROYAL DIAGNOSTICS SOLUTIONS
 GH11 SCHEME NO 54 VIJAY NAGAR
 INDORE
 Registered On: 09/02/2018 12:23 PM
 Collected On: 09/02/2018
 Reported On: 09/02/2018 02:12 PM
 VID: 3117055577

Investigation	Observed Value	Unit	Biological Reference Interval
Thyroid panel-1 (T3,T4,TSH) (Serum-ECLIA)			
T3 (Total)	179.8	ng/dL	94-241
T4 (Total)	6.12	µg/dL	5.4-13.3
TSH (Ultrasensitive)	4.55	µIU/mL	0.45-4.5

INTERPRETATION

TSH	T3 / FT3	T4 / FT4	Suggested Interpretation for the Thyroid Function Tests Pattern
Within Range	Decreased	Within Range	Isolated Low T3 often seen in elderly & associated Non-Thyroidal illness. In elderly the drop in T3 level can be upto 25%.
Raised	Within Range	Within Range	Isolated High T3 especially in the range of 4.7 to 15 µIU/ml is commonly associated with Physiological & Biological TSH Variability, Quinacrine Autoimmune Hypothyroidism, intermittent T4 therapy for hypothyroidism, recovery phase after Non-Thyroidal illness.
Raised	Decreased	Decreased	Classic Autoimmune Thyroiditis, Adult Hypothyroidism, Post radioactive Iodine/Thyroidal phase of Graves Thyroiditis.
Raised or within Range	Raised	Raised or within Range	Anti-thyroid antibodies to Thyroid hormones (anti-TPO antibodies, Anti-thyroglobulin antibodies).

Name: KHUBI
Age: 11 Years **Sex:** Female
Referred by: DR. ARPIT CHOPRA
Received On: 29-Apr-2018 10:25
Drawn On: 29-Apr-2018 10:20
Print Date: 30-Apr-2018 17:13
Accession No.: 1804121633

Parameter	Result	Unit	Biological Reference Interval
T3, T4, TSH			
T3 (Triiodothyronine) Total	1.32	ng/mL	0.58 - 1.78
TT3, Serum			
Method: By Chemiluminescence on Automated Immunoassay System			
Biological Reference Interval in pregnancy: 1st Trimester: 0.81 to 1.90, 2nd and 3rd trimester: 1.00 to 2.60			
Biological Reference Interval from: Tietz Text Book of Clinical Chemistry & Molecular Diagnostics, Fifth Edition, Carl A Burtis, Edward R Ashwood, David E Burns, 2012.			
T4 (Thyroxine) Total, TT4, Serum	7.10	µg/dL	4.57 - 12.23
Method: By Chemiluminescence on Automated Immunoassay System			
Biological Reference Interval from: Tietz Text Book of Clinical Chemistry & Molecular Diagnostics, Fifth Edition, Carl A Burtis, Edward R Ashwood, David E Burns, 2012			
Ultrasensitive TSH (Memot-CLIA)	1.14	µIU/mL	0.34 - 5.60
Biological Reference Interval in Pregnancy: 1st Trimester: 0.30 to 4.80, 2nd Trimester: 0.50 to 4.40, 3rd Trimester: 0.80 to 5.20			
INTERPRETATION: High levels are found in primary hyperthyroidism, drugs like dopamine antagonist and iodine containing agents etc. Suppressed levels are found in hypothyroidism, secondary pituitary or hypothalamic hypothyroidism (e.g. tumour, stroke) etc. Thyroid function tests change during pregnancy. The thyroid is functioning normally if the TSH, Free T4 and Free T3 are all normal throughout pregnancy and should be checked approximately every 6-8 weeks. (REFERENCE: Watson's Interpretation of Diagnostic Test, Ninth Edition, 353, 354, American Thyroid Association, June, 2012, 2013.)

Name: JYOTI SHARMA
Age: 35 Year(s) **Sex:** Female
Referred by:
Received On: 19/04/2018 08:27 PM
Drawn On: 19/04/2018
Print Date: 20/04/2018 01:01 PM
Accession No.: 31180104595
Reference: DR. ARPIT CHOPRA
 Sample Collected At: ROYAL DIAGNOSTICS SOLUTIONS
 GH11 SCHEME NO 54 VIJAY NAGAR
 INDORE

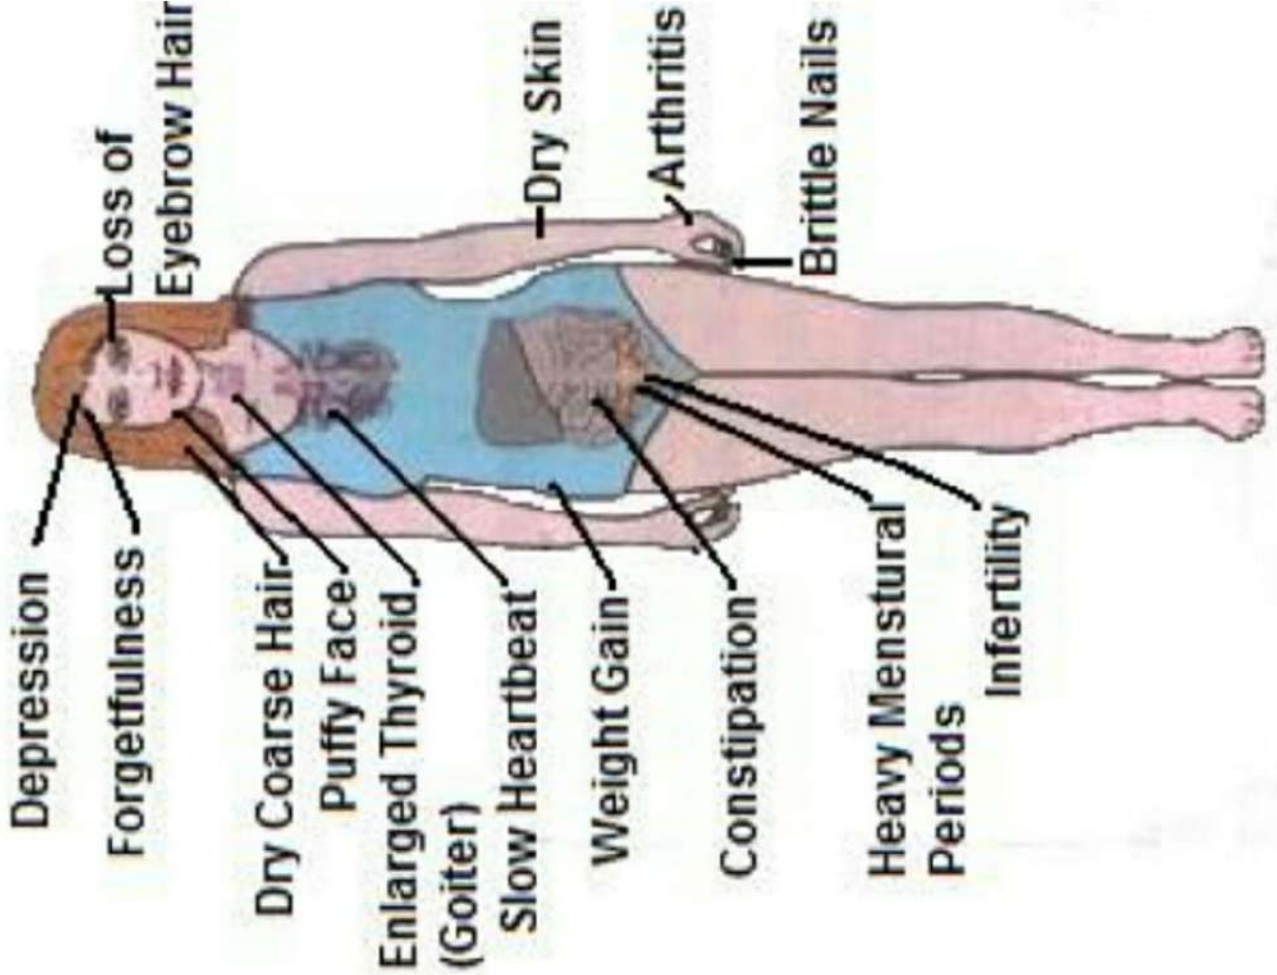

Investigation	Observed Value	Unit	Biological Reference Interval
TSH (Ultrasensitive) (Serum-ECLIA)	4.18	µIU/mL	0.45-4.5
First Trimester:			0.1-2.5
Second Trimester:			0.2-3.0
Third trimester:			0.3-3.0

Interpretation:

- TSH results between 4.5 to 15 show considerable physiologic & seasonal variation, suggest clinical correlation or repeat testing with fresh sample
- TSH results between 0.1 to 0.45 require correlation with patient age & clinical symptoms. As with increasing age, there are marked changes in thyroid hormone production, metabolism & its actions resulting in an increased prevalence of subclinical thyroid disease.
- TSH values may be transiently altered because of non thyroidal illness like severe infections, liver disease, renal and heart failure, severe burns, trauma and surgery etc.
- Drugs that decrease TSH values e.g. L-dopa, Glucocorticoid Drugs that increase TSH values e.g. Iodine, Lithium, Amiodarone.

REPORTED: 29/May/2018

Glycosylated Hb (HbA1c)

TEST
HbA1c: Glycated Haemoglobin (HPLC)
Estimated Average Glucose (eAG) 208.73 mg/dL

RESULT
8.9 % ↑↑ High
Non-diabetic: 4-6
Excellent control: 6-7
Fair to good control: 7-8
Unsatisfactory control: 8-10
Poor control: > 10

Interpretation & Remark:

- HbA1c is used for monitoring diabetic control. It reflects the estimated average glucose (eAG).
- HbA1c has been endorsed by clinical groups & ADA (American Diabetes Association) guidelines 2012, for diagnosis of diabetes using a cut-off point of 6.5%. ADA defined biological reference range for HbA1c is 4% to 6%. Patients with HbA1c value between 6.0% to 6.5% are considered at risk for developing diabetes in the future.
- Trends in HbA1c are a better indicator of diabetic control than a solitary test.
- Low glycated haemoglobin (below 4%) in a non-diabetic individual are often associated with systemic inflammatory diseases, chronic anaemia (especially severe iron deficiency & haemolytic), chronic renal failure and liver diseases. Clinical correlation suggested.
- To estimate the eAG from the HbA1c value, the following equation is used: $eAG(mg/dL) = 28.7 \times A1c - 46.7$

Patient Name: DAYABEN A.KALSARIYA			
Age / Sex:	28Y/F	Study:	NECK
Referred By:	SELF	Date:	27 August 2018

ULTRASOUND OF THE NECK

- Approx 24 X 17 mm sized predominantly cystic nodule is seen in right lobe showing internal few echogenic area and septations and peripheral vascularity.
- Cystic nodule with eccentric calcification seen in left lobe, measures 8 X 5 mm and show peripheral vascularity.
- Multiple scattered colloidal cysts are seen in both lobes and isthmus.
- The right lobe measures 20 x 18 x 54 mm.
- The Left lobe measures 23 x 15 x 46 mm.
- The isthmus is 4 mm in thickness.

Both parotid & sub-mandibular glands appear normal in size & reflectivity. No focal lesion seen. No e/o calculus or ductal dilatation seen.

The carotid vessels and Jugular vein on either side appear normal.

No evidence of hypoechoic collections seen.

There is no evidence of any cervical lymphadenopathy.

IMPRESSION:

Predominantly cystic nodule in right lobe showing internal few echogenic area and septations and peripheral vascularity.
 Cystic nodule with eccentric calcification in left lobe, measures 8 X 5 mm and show peripheral vascularity.
 Multiple colloidal cysts.

Advise: Clinical and Biochemical correlation.

Compared to previous USG dated- 24.04.2018, There is marginal reduction in largest sizes of thyroid.

Thanks for your referral.

Permanent Modern Homoeopathy Cure With Adjoining Lifestyle
102, First Floor Krishna Tower in front of Durgam Hills
HYDRABAD, INDIA

SHARISH MEHTA
Reference: Diabetic Lab Report
Sample C180212
56, 1st FLOOR, DURGAM HILLS, HYDRABAD, INDIA
Age: 40 Years Sex: Male

Investigation: HBA1C - Glycated Haemoglobin, Blood by HPLC method
Observed Value: 12.8
Reference Range: 5.7-7.8

Estimated Average Glucose (eAG): 270 mg/dL

Interpretation & Remarks:
1. HBA1C is a long-term indicator of blood glucose control. It reflects the average blood glucose levels over the past 2-3 months.
2. The observed value of 12.8% is significantly higher than the reference range (5.7-7.8%), indicating poor glycemic control.
3. This level is associated with a high risk of complications such as retinopathy, nephropathy, and neuropathy.
4. Immediate medical intervention is required to bring the HBA1C level back into the target range.
5. Regular monitoring and adherence to the treatment plan are essential for long-term health.

TEST REPORT

Patient : MRS. SWETA SHRIVASTAV Reg. No : 2007111191
 Age/Sex : 30 Years / Female Reg. Date : 30-Jun-2020
 Ref. By : DR. ARPIT CHOPRA JAIN (M.D. HOMOEOPATHY) Report Date : 20-Jul-2020
 Associate : MAYUR PATHOLOGY INDORE Laboratory

Parameter	Result	Unit	Biological Reference Interval
TSH	4.66	µIU/ml	0.35 to 5.00 Up to 1 year 0.5 - 10.0 During Pregnancy First Trimester : 0.25 - 2.68 Second Trimester : 0.55 - 2.72 Third Trimester : 0.43 - 2.91

Interpretation : TSH levels may be affected by acute illness and drugs like theophylline and glucocorticoids. Low or undetectable TSH is suggestive of Graves' disease. TSH between 0.5 to 10.0 with normal T3/T4 indicates subclinical hypothyroidism. TSH suppression does not reflect quality of thyroid hormone replacement. T3/T4 are the primary test. TSH measurement is not necessary to monitor therapy. TSH measurement is not necessary to monitor therapy. TSH level can rise to be misleading in patients on treatment. Therefore Free T3, Free T4 along with TSH should be checked during pregnancy closely. T3/T4 can be checked during pregnancy closely. T3/T4 can be checked during pregnancy closely.

Type 1 diabetes

Also called: juvenile diabetes

Overview

Symptoms

Treatments

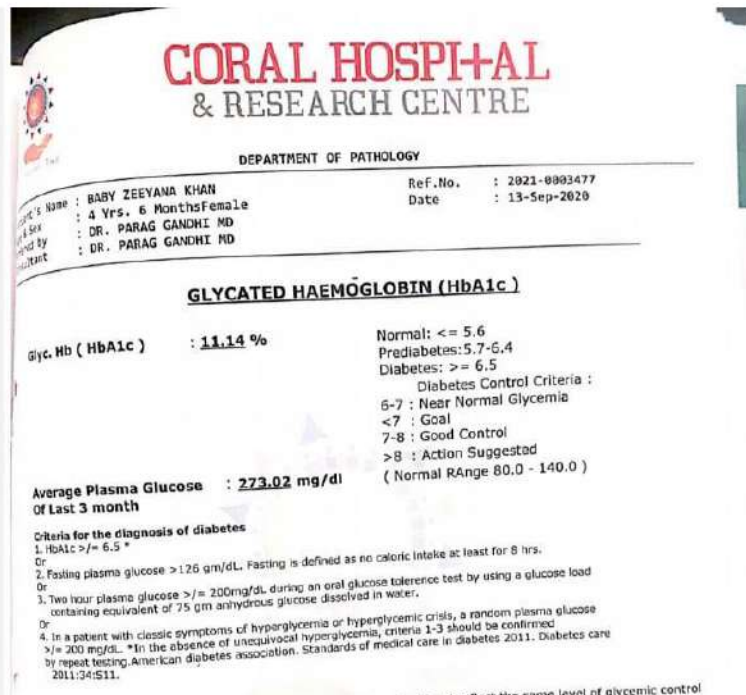

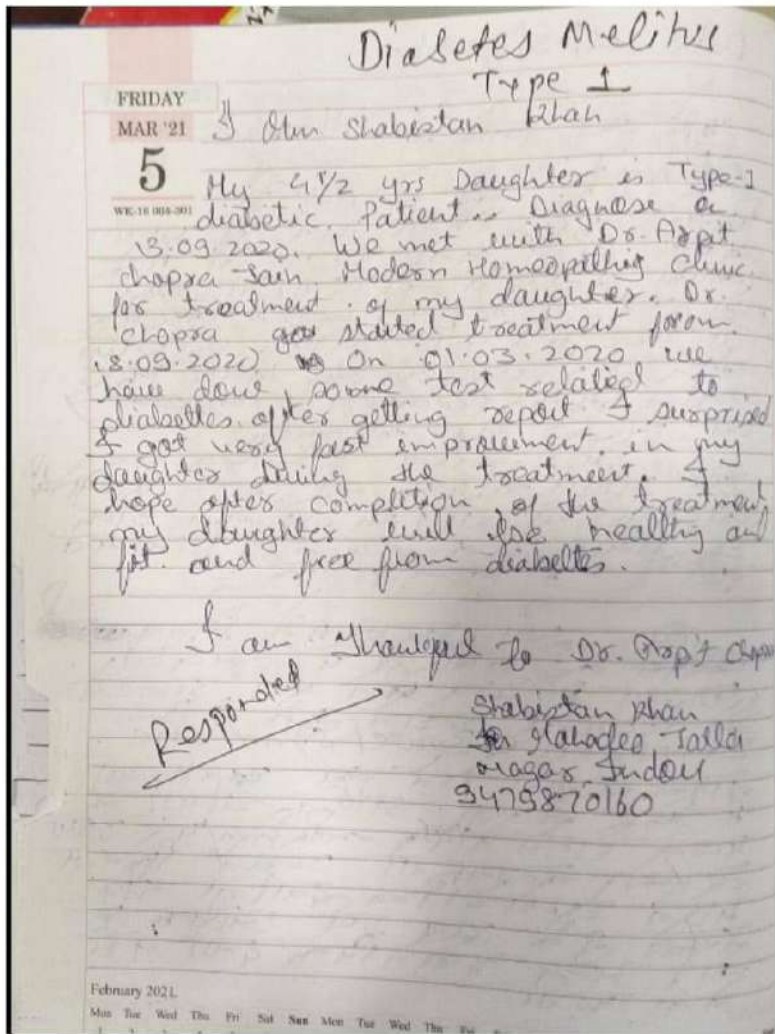

A chronic condition in which the pancreas produces little or no insulin.

It typically appears in adolescence.

Common

More than 1 million cases per year (India)

-  Treatment can help, but this condition can't be cured
-  Requires a medical diagnosis
-  Lab tests or imaging always required
-  Chronic: can last for years or be lifelong
-  Critical: needs emergency care

Hypothyroidism

Also called: underactive thyroid

- Overview
- Symptoms
- Treatments

A condition in which the thyroid gland doesn't produce enough thyroid hormone.

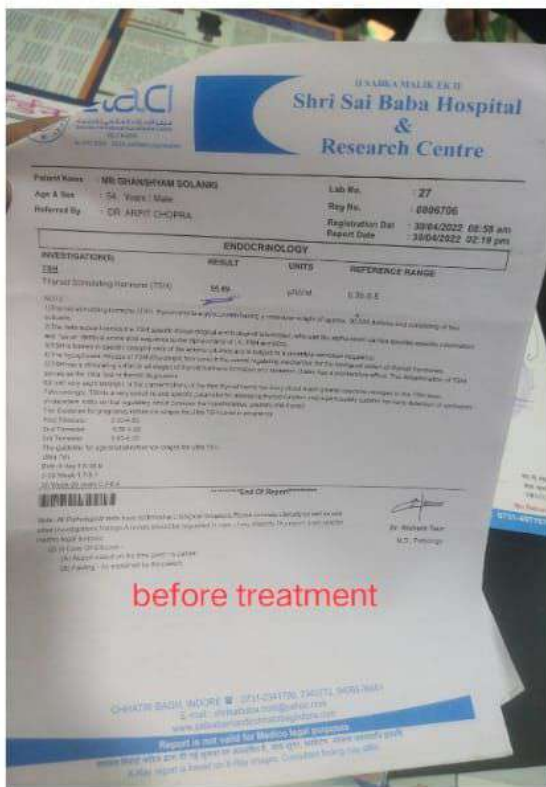

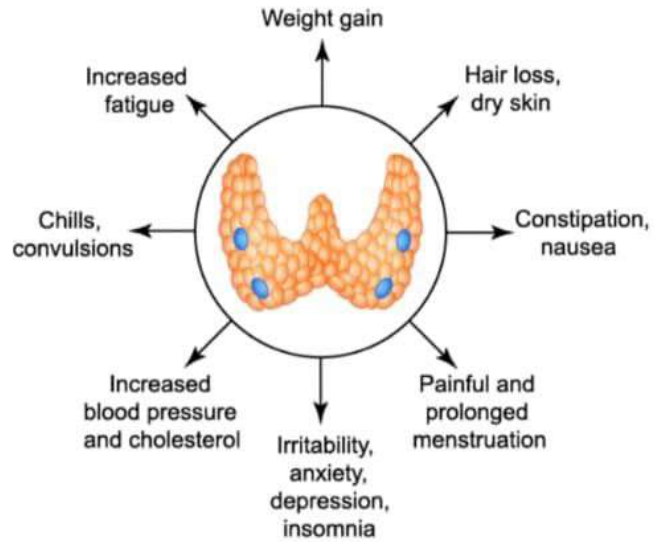

Hypothyroidism's deficiency of thyroid hormones can disrupt such things as heart rate, body temperature and all aspects of metabolism. Hypothyroidism is most prevalent in older women.

Very common

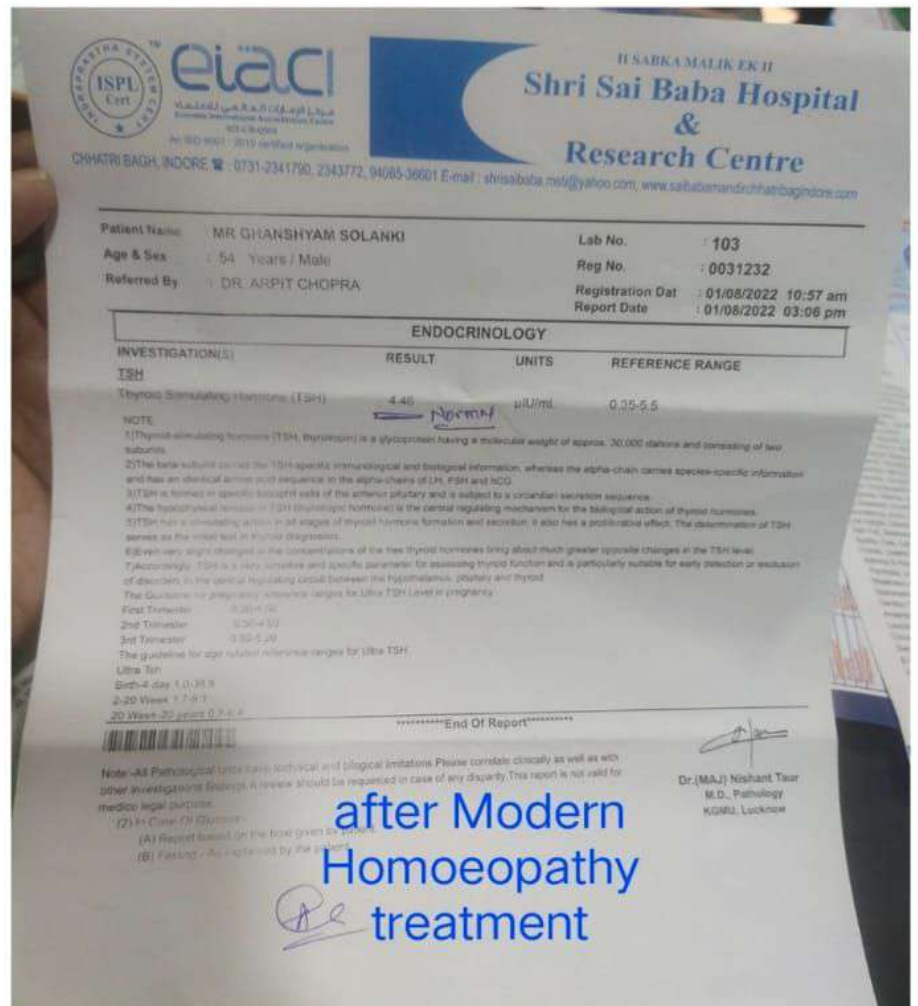

More than 10 million cases per year (India)

- Treatable by a medical professional
- Requires a medical diagnosis
- Lab tests or imaging always required
- Chronic: can last for years or be lifelong

05.02.2024

MRS. AMI SHARMA AGE 43 YEARS

THYROID SONOGRAPHY FOLLOW UP

Right lobe of thyroid are normal in size and contour with normal echotexture.
Isthmus is normal.

Before Treatment

- Left lobe of thyroid is minimal enlarged and reveal a 25x19x23mm round cystic lesion with thick wall with internal echoes and debris highly suggestive of adenomatous nodule/cystoma with cystic and hemorrhagic degeneration.
- Compare to my earlier reports of 22.06.2022 and 05.06.2023 there is slight increased in size possibly secondary to cystic hemorrhagic degeneration

No significant nodes.

DR. H. K. KARMALKAR

Indraprastha DIAGNOSTICS
Committed to holistic medicine

Patient Name: Ms. AMI SHARMA
Age/Sex: 46 Y O M O D /Female
Referred By: Dr. BASE HOSPITAL

Lab NO: 012405010016
Test Date: 01-May-2024
Report Date: 01-May-2024

ULTRASOUND - NECK

THYROID GLAND - right lobe and isthmus are normal in size and echotexture, with no obvious solid/ cystic lesion.

Right lobe measures 8 x 16 x 36 mm
Left lobe measures 8 x 14 x 31 mm
Isthmus measures 2.5 mm.

After Dr Arpit Chopra Jain Modern Homoeopathy

There is evidence of a cystic lesion measuring 11.3 x 11.6 x 12.5 mm (vol- 81 cc) is seen in left lobe with internal iso to hyperechoic component showing no internal vascularity s/o complex cyst ? hemorrhagic/ resolving colloid cyst.

Bilateral submandibular glands - appear normal in bulk and show normal echotexture.

Bilateral great vessels of neck (carotids, IJV -visualized parts) show echofree lumen with normal color flow.

Bilateral strap muscles appear normal in bulk and echotexture.

No obvious enlarged cervical lymph nodes seen on either side.

IMPRESSION: Cystic lesion in left lobe of thyroid ? Hemorrhagic/ resolving colloid cyst.

(As compared to previous scan dated 04.03.2023, there is decrease in size of above mentioned lesion)

INTERPRETATION

TSH	T3 / FT3	T4 / FT4	Suggested interpretation for the Thyroid Function Tests Pattern
Within Range	Decreased	Within Range	• Isolated Low T3-often seen in elderly & associated Non-Thyroidal illness. In elderly the drop in T3 level can be upto 25%.
Raised	Within Range	Within Range	• Isolated High TSH especially in the range of 4.7 to 15 mIU/ml is commonly associated with Physiological & Biological TSH Variability. • Subclinical Autoimmune Hypothyroidism • Intermittent T4 therapy for hypothyroidism • "Recovery phase after Non-Thyroidal illness"

TSH (Thyroid Stimulating Hormone)

Ultrasensitive TSH

Method: CLIA

Biological Reference Interval in Pregnancy: 1st Trimester: 0.30 to 4.50, 2nd Trimester: 0.50 to 4.60, 3rd Trimester: 0.80 to 5.20

INTERPRETATION: High levels are found in primary hypothyroidism, drugs like dopamine antagonist and iodine containing agents etc. Low levels are found in hyperthyroidism, secondary pituitary or hypothalamic hypothyroidism (e.g. tumour, infiltrative disease etc.)

During pregnancy the thyroid is functioning normally if the TSH is less than 2.5 mIU/L in the 1st trimester, less than 3.0 mIU/L in the 2nd trimester and less than 3.5 mIU/L in the 3rd trimester. [REFERENCE: Wallerstein et al., JAMA 1994; 271: 1082-1085]

Diabetes

Also called: diabetes mellitus

A group of diseases that result in too much sugar in the blood (high blood glucose).

MOST COMMON TYPES

Type 2 diabetes

A chronic condition that affects the way the body processes blood sugar (glucose). >

Type 1 diabetes

A chronic condition in which the pancreas produces little or no insulin. >

Prediabetes

A condition in which blood sugar is high, but not high enough to be type 2 diabetes. >

Gestational diabetes

A form of high blood sugar affecting pregnant women. >

 INTERPRETATION & LIMITATION: Average Blood Glucose Value and it indicate Average Blood Sugar level over past three months.
 False increased Values:
 (1) Formation of Schiff Base pre-HbA1c
 (2) HbF above normal.
 (3) Splenectomy
 (4) Chronic renal failure with or without hemodialysis.
 (5) Lead and Cadmium toxicity.
 (6) Iron deficiency anaemia.

False decreased values:
 (a) Shortened RBC life span: Presence of HbS, HbC, HbD

Test Report Status	Final	Results	Biological Reference Interval	Units
HAEMATOLOGY				
GLYCOSYLATED HEMOGLOBIN(HbA1C), EDTA WHOLE BLOOD				
HbA1C		12.8	Normal Control: 4.0-5.5 % Good Control: 5.1-7.0 Glycemic Control: 6.1-7.0 Poor Control: >7.1	%
ESTIMATED AVERAGE GLUCOSE(EAG)				
		330.7	<116	mg/dL

During Dr Arpit Chopra Jain Modern Homoeopathy

Interpretation(s)
GLYCOSYLATED HEMOGLOBIN(HbA1C), EDTA WHOLE BLOOD used For:

- Evaluating the long-term control of blood glucose concentrations in diabetic patients.
- Diagnosing diabetes.
- Identifying patients at increased risk for diabetes (prediabetes).

The ADA recommends measurement of HbA1C (Glycemic Control) in patients with diabetes mellitus who are on long-term well-controlled Type 2 diabetic patients to determine whether a patient requires adjustment of therapy.

- EAG (Estimated Average Glucose) converts average HbA1C results to average blood glucose levels.
- EAG gives an evaluation of blood glucose levels for the last range of months.
- EAG is calculated as EAG (mg/dL) = 28.7 * HbA1C + 46.7

HbA1c Estimation can get affected due to:

- Shortened erythrocyte survival - any condition that stresses erythrocyte survival or causes premature removal of erythrocytes (hemolysis) will falsely lower HbA1c test results (especially in those patients who undergo dialysis control over of HbA1c).
- Vitamin C & E are reported to falsely lower test results, possibly by interfering with the reaction of hemoglobin.
- Iron deficiency anemia is reported to increase test results. Hemoglobinopathies, hypothyroidism, chronic liver disease, chronic kidney disease & alcoholism are reported to interfere with some assay methods, falsely raising results.

Thyroid-Stimulating Hormone (TSH), Serum

Parameters	Observed Value	Unit	Biological Reference Interval
TSH - Thyroid-Stimulating Hormone	14.33*	mIU/mL	0.35 - 5.55

Interpretation : Method : By Chemiluminescence
TSH levels may be affected by acute illness and drugs like doxapamine and glucocorticoids. Low or undetectable TSH is suggestive of Grave's disease. TSH between 5.5 to 15.0 with normal T3 T4 indicates impaired thyroid hormone or subclinical hypothyroidism or normal T3 T4 with this slightly low TSH suggests subclinical hyperthyroidism. TSH < 0.01 suggests hyperthyroidism.

Service Project Infrastructure: Making Medical Care Accessible to All

"Medical facilities should be accessible to the common man in every way." Dr. Arpit Chopra Jain

To make his groundbreaking medical invention available to the general public, Professor Dr. Arpit Chopra Jain has established the Aarogya Super Speciality - Modern Homoeopathy Clinic, equipped with state-of-the-art facilities, at Janjirwala intersection in the heart of Indore city. At this clinic, patients have access to comprehensive consultation, diagnosis, and treatment for various diseases, all under one roof.

In addition, a dedicated consultation room for online patients has been set up to offer virtual consultations. Medicines are delivered through courier services, ensuring that even the most serious conditions can be treated from the comfort of one's home. Dr. Arpit Chopra Jain's initiative ensures that high-quality healthcare is not just limited to in-person visits but is also accessible to those in distant locations.

Dr. Arpit Chopra Jain: A Commitment to Service and Responsibility

Dr. Arpit Chopra Jain, raised in a family of doctors, embodies the true essence of a dedicated medical professional. With a deep sense of responsibility toward human welfare, he has revolutionized healthcare through his groundbreaking invention of Super Speciality Modern Homoeopathy treatment. His work has provided a new direction in treating complex diseases, ensuring that even those who once felt hopeless have found relief.

campaign to combat sickle cell anemia, Dr. Arpit Chopra Jain is also working tirelessly in tribal areas. His efforts contribute significantly to the permanent and successful treatment of this genetic disorder, further reflecting his unwavering commitment to the welfare of humanity.

Dr. Arpit Chopra Jain also organizes medical camps aimed at diagnosing complex diseases, providing free consultations to those in need. His sense of duty was especially evident during the devastating COVID-19 pandemic, where he took extraordinary measures to help his community. Understanding the gravity of the situation, he distributed free Corona prevention medicines to approximately 2,25,000 people, including Corona Warriors, potentially saving many lives.

Dr. Arpit Chopra Jain exemplifies what it means to be a physician who balances medical practice with social responsibility, continuing to make a profound impact on both individual lives and society as a whole.

Recognizing the significance of his role, Dr. Arpit Chopra Jain extends his responsibilities beyond medical practice. He considers it his moral and national duty to contribute to various social service activities. Along with treating complicated medical conditions, Dr. Arpit Chopra Jain is committed to shaping the future of homoeopathy. He actively mentors and educates new students entering the field, helping them gain the knowledge necessary to advance in medical science.

Samman Awards: A Tribute to Responsibility and Service

"Respect received from society increases responsibility." Dr. Arpit Chopra Jain

Dr. Arpit Chopra Jain believes that when one contributes responsibly and at the right time, society offers its respect. However, with that respect comes an even greater sense of responsibility.

Dr. Arpit Chopra Jain, through his groundbreaking invention of the Arogya Super Speciality Modern Homoeopathy medical system and his numerous social contributions, has garnered widespread recognition. His dedication to improving the health and well-being of others has not gone unnoticed. He has been honored by many prominent ministers, intellectuals, and senior artists across various dignified platforms. These awards have been bestowed upon him by social, national, and international institutions, further acknowledging his remarkable contributions to the field of medicine and humanity.

This recognition only fuels Dr. Arpit Chopra Jain's determination to continue serving society with even greater dedication and responsibility.
