AAROGYA SUPER SPECIALITY MODERN HOMEOPATHY**

COMPLETE, EASY SAFE, FAST & COST-EFFECTIVE CURE

Dr. Arpit Chopra Jain M.D Homeopath

Critical and Surgical Disease Specialist

Dr. Arpit Chopra Jain: Transforming Global Healthcare with Aarogya super Speciality Modern Homeopathy.

Dr. Arpit Chopra Jain, a pioneer in advanced homeopathic medicine, is set to present groundbreaking clinical data comprising over 3,000 successfully treated cases of critical and surgical diseases — all cured without the need for surgery. This revolutionary treatment approach, developed and practiced exclusively by Dr. Jain, utilizes high-potency homeopathic medicines formulated by him, offering fast, safe, and side-effect-free results.

With over 21 years of experience, Dr. Jain has dedicated his life to providing an alternative yet powerful medical solution that not only preserves the body's original organs but also ensures deep, lasting cures. **His work has gained national and international recognition. He has been honored by India's Vice President, Defense Minister Shri Rajnath Singh, Health Minister Shri J. P. Nadda, and several other dignitaries.** In acknowledgment of his contributions, he has also received a prestigious honorary doctorate from the USA.

Dr. Arpit Chopra Jain proudly represents India on the international stage as the **Homeopathic Representative for BRICS (Russia)** and continues to raise the global profile of homeopathy through his one-of-a-kind center based in Indore, Madhya Pradesh, India. From this single center, he has reached and treated patients from over 19 countries, offering remote consultations and delivering life-changing results globally.

Recently, **Dr. Jain was invited as the Guest of Honor at the highly esteemed United Nations Global Excellence Awards held at the UN Headquarters in New York, hosted by the United Nations Global Peace Council.** This momentous occasion was a testimony to his relentless commitment and global vision for homeopathy.

His work is supported by real, verifiable patient testimonials, including pre- and post-treatment reports, available on his official website and YouTube channel. These authentic stories reflect the effectiveness and rapid healing power of his treatment.

This book is a humble attempt to introduce Dr. Jain's extraordinary journey and his mission — to make the world healthier without surgery, promoting natural healing through scientifically advanced homeopathic medicine. His goal is to create a safer, more cost-effective, and organ-preserving healthcare alternative for patients across the globe.

The identity of any person is his real wealth.

INTRODUCTION

Inventor of Aarogya Super Speciality Modern Homoeopathy, revolutionized treatment for complex diseases

Professor Dr. Arpit Chopra Jain

Professor Dr. **Arpit Chopra Jain**, with over 20 years of medical experience and research, has revolutionized classical homeopathy by developing a future-oriented, super-speciality modern homoeopathy treatment system. His innovative approach has given new physical, mental, and social life to thousands of patients who were once considered incurable, including those suffering from nearly 300 different diseases such as cancer, kidney failure, coma, aplastic anemia, and other serious conditions requiring surgical intervention. In doing so, he has also fulfilled the World Health Organizations (WHO) belief that true health encompasses physical, mental, and social well-being.

Originally from Chhattisgarh, Dr. Arpit Chopra Jain received his primary education in his home state before moving to Indore to pursue a Bachelors degree in Homeopathy. After completing his BHMS, he earned an MD in Homeopathy from DKMM Homoeopathic Medical College in Aurangabad, Maharashtra. During his studies and career, he worked alongside many renowned allopathic doctors in Indore and other locations, acquire practical experience and contributing to medical advancements.

Currently, Dr. Arpit Chopra Jain is providing medical services through the Aarogya Super Speciality Modern Homoeopathy Clinic, located at Janjirwala Square in Indore, where he leads a team of experienced professionals. In addition to his clinical work, Dr. Arpit Chopra Jain plays a pivotal role in shaping homeopathic education as an educator at RN Kapoor Homoeopathic Medical College. His research focuses on complex blood-related diseases, including aplastic anemia and sickle cell anemia.. Driven by a commitment to innovation, Dr. Jain has been nationally and internationally recognized for his groundbreaking contributions to the treatment of complex and incurable diseases. His exceptional service during the COVID-19 pandemic further highlights his dedication to advancing modern homeopathic medicine.

Many of Dr. Arpit Chopra Jain's patients regard him as a godsend, praising his unwavering commitment to serving humanity. Beyond his medical practice, Dr. Arpit Chopra Jain, who hails from a family of 19 physicians, is making significant contributions to society and the Nation.

He firmly believes that Aarogya Super Speciality Modern Homoeopathy - instant, effective, affordable, and without side effects is the future of homoeopathy. While homoeopathy may have originated in Germany, Dr. Arpit Chopra Jain is confident that India's revolutionary modern homoeopathic medical system will one day be recognized globally, inscribing India's name in golden letters on the world health chart. He and his team are making every possible effort to achieve this vision and will continue to do so.

Golden India's Revolutionary Discovery: Pioneering the Future of Healthcare with Advanced Homoeopathy

Homoeopathy, a system of alternative medicine established over 200 years ago by German physician Dr. Samuel Hahnemann, has experienced widespread adoption across various countries, including India. However, over time, it faced criticism and was even banned in certain regions due to persistent myths and misconceptions, such as its alleged placebo effect. Critics claimed that homoeopathic remedies were ineffective, slow to act, and not backed by scientific evidence, leading to widespread skepticism among both the public and the scientific community.

One significant issue was that classical homoeopathy relied heavily on treating patients based on symptoms alone, without extensive clinical documentation or diagnostic reports. This absence of empirical evidence made it challenging to validate its effectiveness through conventional medical research methods.

In response to these challenges, Dr. Hahnemann later developed a more potent form of homoeopathic medicine, known as the 50 millesimal potency, or 5 million power. However, by the time this advancement was introduced, classical homoeopathy had already established deep roots, and the lack of continued research, documentation, and clinical validation led to its gradual decline in some regions.

Recognizing the need to address these limitations, Professor Dr. Arpit Chopra Jain, with over 20 years of clinical and hospital experience, pioneered a groundbreaking approach known as Super Speciality Modern homoeopathy. Utilizing the powerful 50 lakh potency homoeopathic medicines, along with mother tinctures, biochemic treatments, and dilutions, Dr. Jain's revolutionized the practice by effectively treating severe autoimmune conditions, including cancer, kidney failure, aplastic anemia, sickle cell anemia, rheumatoid arthritis, ankylosing spondylitis, and many other life-threatening illnesses. This innovative treatment approach has produced remarkable results, enabling patients suffering from complex and incurable diseases to recover without any side effects or lifelong medication dependency. Dr. Jain's method has proven particularly effective in cases previously deemed untreatable, such as patients in comas, those with brain tumors, or those in the terminal stages of illness.

His success extends beyond India, benefitting patients in countries such as Pakistan, Dubai, Bangladesh, the United States, and the United Kingdom.

A key differentiator of Super Speciality Modern Homoeopathy is its integration of clinical pathology alongside traditional symptom-based diagnosis. Dr. Jain's has meticulously collected pre- and post-treatment test reports from over 3,000 successfully treated patients, along with their written testimonials and interviews, both online and offline. This substantial body of evidence aims to secure recognition for his treatment methodology within the broader medical community, ensuring future generations of homoeopathic practitioners can offer hope to patients who might otherwise remain hopeless.

Dr. Jain's innovative work continues to shape the future of homoeopathy providing a new path forward for both patients and healthcare providers worldwide.

Complete Cure, Permanent, Easy, Safe, Fast, Cost Effective.

Aarogya Super Specialty Modern Homoeopathy -

It is a modern medical science which incorporates the basic nature of homoeopathy and keeps it as its basis and includes many other new features.

Easy Method -

In Aarogya Super Speciality Modern Homoeopathy, a variety of homoeopathic medicines are utilized, including decimal potency, centesimal potency, 50 millesimal potency, mother tinctures, biochemic medicines, The method of administering these medicines is straightforward and can be easily followed in the prescribed dosage under the guidance of a qualified homoeopathic doctor. One of the unique aspects of Aarogya Super Speciality Modern Homoeopathy is that it does not work with the traditional restrictions often associated with homoeopathic treatment, such as avoiding strong-smelling substances during medication. Due to the high quality and potency of the medicines used, these minor misconceptions hold no relevance in this advanced system of treatment. This approach allows for effective treatment without the need for strict dietary restrictions, making it more accessible and easier for patients to adhere to. Aarogya Super Speciality Modern Homoeopathy excels in providing top-tier treatment with minimal medication, even for complex and difficult-to-treat conditions. In this system, various diseases are treated directly and comprehensively, whether through homoeopathic medicines alone or in combination with supportive medicines from other medical systems, depending on the patients condition and the nature of the disease. This holistic approach ensures that patients receive the most effective and personalized care

Harmless Medical Method -

One of the most remarkable aspects of Aarogya Super Speciality Modern Homoeopathy is its safety profile, even when high potencies are used. Unlike conventional treatments where the risk of side effects increases with the dosage of active ingredients, homoeopathic medicines are carefully prepared through a process called potentiation. In this process, the original substance is diluted while simultaneously increasing its potency. This unique method ensures that only a minimal amount of the chemical or raw material remains in the final product. As a result, Aarogya Super Speciality Modern Homoeopathy offers highly effective treatments without the risk of harmful side effects. The approach is practically unmatched in other branches of medical science, where larger doses of active substances can often lead to adverse reactions. In this way, modern homoeopathy provides a safe and natural healing method, making it an ideal option for individuals seeking a harmless yet potent solution to their health issues.

Fast Aggressive Treatment -

One of the most remarkable aspects of Aarogya Super Speciality Modern Homoeopathy is its fast and aggressive healing process, setting it apart from conventional homoeopathy. In this advanced system, medical expertise is combined with cutting-edge technology, including computerized software, to ensure rapid, accurate diagnosis and treatment. Doctors utilize a vast array of over 4,000 potent medicines, with strengths ranging from zero potency to an astonishing 50 lakh potency, making the treatment scientifically robust and effective for a wide range of diseases. The precision of this method allows doctors to quickly gather and analyze detailed information about a patients condition, helping them select the most suitable remedy. This tailored approach ensures that even severe, surgical, or seemingly incurable conditions are addressed efficiently and effectively. What makes this treatment truly revolutionary is its ability to provide fast relief without any side effects, transforming it into a powerful, unique, and highly reliable branch of medical science.

Complete cure of diseases from the root -

Aarogya Super Speciality Modern Homoeopathy aims to heal the patient completely body, mind, and soul ensuring not only recovery from current ailments but also preventing the recurrence of diseases throughout life. This holistic approach to treatment is a crucial aspect of any effective medical science.

This fast and aggressive treatment approach embodies the future of homoeopathy, offering hope to patients facing complex diseases while maintaining the core principles of safety, simplicity, and efficacy.

Cost-Effective Treatment with Aarogya Super Speciality Modern Homoeopathy

Despite its advanced and multifaceted approach, Aarogya Super Speciality Modern Homoeopathy remains highly affordable and accessible, making it a preferred choice for many. Compared to other medical systems, it offers a cost-effective solution while providing complete, safe, and test treatment. This affordability, combined with its ability to deliver immediate results without harmful side effects, has contributed to the growing global popularity of modern homoeopathy. Today, homoeopathy is trusted by millions, with affordable medicines available to those in need. Every fourth person in the world now benefits from homoeopathy in some form, relying on its holistic and comprehensive approach to healthcare.

Dr. Arpit Chopra Jain, M.D. in Homoeopathy and the inventor of Aarogya Super Speciality Modern - Homoeopathy, has been instrumental in making this revolutionary treatment accessible to people from all walks of life. His commitment to providing effective, affordable, and harmless treatment has redefined the landscape of healthcare, offering hope and healing to thousands.

Aarogya Super Speciality Modern Homoeopathy

Successful Treatment of Critical Health Conditions

Dr. Jain's innovative treatment method has shown exceptional results in managing and curing serious health conditions, including:

- Cancer
- Kidney Diseases
- Coma
- Blood Disorders such as sickle cell anemia and aplastic anemia
- Arthritis
- Autoimmune Diseases
- Neurological Disorders
- Heart Diseases
- Skin Conditions like psoriasis and dermatitis

Through a deep understanding of the body's internal balance, Aarogya Super Speciality Modern Homoeopathy targets the root causes of these diseases, promoting natural self-healing without the need for invasive procedures or lifelong medications.

Revolutionizing Disease Treatment

Aarogya Super Speciality Modern Homoeopathy, developed by Dr. Arpit Chopra Jain, has introduced a groundbreaking, holistic approach to treating a wide range of complex and chronic diseases. This method offers a comprehensive, harmless, cost-effective, and permanent solution, achieving remarkable success where conventional treatments often fall short.

Efficacy Across a Wide Range of Diseases

With a proven record of success in treating nearly 300 different diseases, Aarogya Super Speciality Modern Homoeopathy offers relief from conditions that affect various aspects of health. Patients suffering from:

- Allergies
- Womens Health Issues
- Urological and Gastric Problems
- Rheumatoid Arthritis
- Pediatric Conditions
- Spinal Cord Disorders

have all experienced life-changing results through this pioneering method.

A New Lease on Life

What truly sets this treatment apart is its ability to provide lasting and permanent relief. Patients who were previously dependent on lifelong medication or faced invasive surgeries have regained their health, returning to a normal, medication-free life. Aarogya Super Speciality Modern Homoeopathy continues to transform lives, offering a new, holistic approach for those suffering from complex and chronic diseases.

Rheumatological Disease

Aarogya Super Speciality Modern Homoeopathy, as practiced by Dr. Arpit Chopra Jain, has emerged as a highly effective treatment for rheumatological diseases, which are often associated with persistent pain in the hands, legs, waist, and other joints. While many people may temporarily find relief with painkillers, the continuous presence of such pain can be an early sign of a serious rheumatological disorder. Due to a lack of awareness, these symptoms are often ignored, leading to the progression of conditions that require lifelong medication in conventional medicine.

Rheumatology focuses on diseases that affect the joints, soft tissues, and autoimmune systems, and it encompasses a wide range of conditions, including:

- Arthritis (various types)
- Rheumatoid arthritis
- Gout
- Ankylosing spondylitis
- Fibromyalgia
- Hashimoto thyroiditis
- Psoriatic arthritis
- Systemic lupus erythematosus (SLE)

These diseases can affect various parts of the body, and in conventional allopathic medicine, many are considered incurable. Patients are typically prescribed long-term treatments involving painkillers, antibiotics, and steroids. In severe cases, surgery may be recommended. These treatments often come with side effects, high costs, and the risk of recurring symptoms.

However, Dr. Arpit Chopra Jain's Aarogya Super Speciality Modern Homoeopathy offers an alternative that provides outstanding results without side effects. His approach treats these "incurable" diseases from the root, helping patients recover their health and live normal **lite** without the need for prolonged medication or surgical intervention. By addressing the underlying causes of rheumatological conditions, this method offers faster relief, lower costs, and a complete cure, restoring quality of life for many patients.

Bursitis

Bursitis (bur-SY-tis) is a painful condition that affects the small, fluid-filled sacs — called bursae (bur-SEE) — that cushion the bones, tendons and muscles near your joints. Bursitis occurs when bursae **become inflamed**. The most common locations for bursitis are in the shoulder, elbow and hip.

15 Overlap Syndrome/Rheumatoid Arthritis & SLE
 THURSDAY - SEPTEMBER
 SEPTEMBER 2022

मेरा नाम वीजू शर्मा है। मुझे 18 सालों से गठिया रोग है। जिनसे जो प्रतिक्रियाएं आती हैं वे रोकथाम लेने मुझे 1 माह इलाज हो चुका है मुझे बहुत आराम है डॉ. चिकित्सा का बहुत-बहुत धन्यवाद।
 (आपका चिकित्सा मुझे इस रोग से दवाइयों से भरी पूरी किशोरी ठीक हो जाये।)

रसिता Rana

मेरा नाम अंशुली

Arthritis

Also called: joint inflammation

Overview

Symptoms

Treatments

Inflammation of one or more joints, causing pain and stiffness that can worsen with age.

Different types of arthritis exist, each with different causes including wear and tear, infections and underlying diseases.

Very common

More than 10 million cases per year (India)

- 🩹 Treatment can help, but this condition can't be cured
- 📅 Requires a medical diagnosis
- 🏠 Lab tests or imaging often required
- 🕒 Chronic: can last for years or be lifelong

Rheumatoid arthritis

Also called: RA

ABOUT

SYMPTOMS

TREATMENTS

A chronic inflammatory disorder affecting many joints, including those in the hands and feet.

Common

More than 1 million cases per year (India)

Treatment can help, but this condition can't be cured

Requires a medical diagnosis

Lab tests or imaging always required

Mrs. PRATIBHA CHOUHAN

Collected On:
17/12/2017
Reported On:
17/12/2017 03:57 PM

Investigation	Observed Value	Unit	Biological Reference Interval
RA-Rheumatoid Arthritis-IgM, Serum (Serum Rheumatoid)	669.90	IU/mL	Non-reactive: < 18

- Interpretation:**
- The detection of rheumatoid factor (RF) is one of the criteria of the American Rheumatism Association (ARA) for the diagnosis of Rheumatoid Arthritis (RA).
 - RFs play an important role in the differential diagnosis between RA and other rheumatic diseases. They also permit prognostic statements with regards to RA.

RHEUMATOID FACTOR (Latex Agglutination Test)

Dilution Titre	1:1	1:2	1:4	1:8	1:16	1:32	Control	
							+Ve	-Ve
Visible Agglutination	-	-	-	-	-	-	+	-

INTERPRETATION : The Latex Agglutination Test Showing Titre Less Than 1 : 20 hence indicates the Absence of Rheumatoid Factor in patient's serum.

REMARKS : Positive/Negative Autoantibody Reactivities are not by themselves diagnostics and must be correlated with other laboratory and Clinical data.

Ila Kaspera

PATHOLOGIST

Rheumatoid arthritis (RA) overview

- ❑ Rheumatoid arthritis is a chronic disease, characterized by periods of disease flares and remissions.
- ❑ The cause of rheumatoid arthritis is not known.
- ❑ In rheumatoid arthritis, multiple joints are usually, but not always, affected in a symmetrical pattern.
- ❑ Rheumatoid arthritis can affect people of all ages.
- ❑ Damage to joints can occur early and does not correlate with the severity of symptoms.
- ❑ The "rheumatoid factor" is an antibody that can be found in the blood of 80% of people with rheumatoid arthritis.

LABORATORY REPORT

Date	18/01/2018	Srl No.	241
Name	Mr. R.L.AGARWAL	Age	81 Yrs.
Ref. By	D.R.A.K.SURIN	Sex	M
Ref. Lab		Accession No.	

Test Name	Value	Unit	Normal Val
<u>SEROLOGY</u>			
R.A FACTOR (QUANTITATIVE)	11.6	IU/ml	0 - 10

INTERPRETATION

ADVANTAGES OF QUANTITATION :
Exact concentrations of RA Factor facilitate the following:

- Accurate staging of disease.
- Precise prognosis and indication of complications.
- Adjustment of dose for treatment and follow up of treatment.

REMARKS -

- RA factor has been demonstrated in approximately 80 % of patients with rheumatoid arthritis.
- False positive results may occur in hepatitis, sarcoidosis, cirrhosis of liver.
- Sjogren's syndrome, acute bacterial and viral infection.
- Diagnosis of rheumatoid arthritis should be made in conjunction with complete clinical evaluation.

ALSO AVAILABLE,

ANTI CCP ANTIBODIES

Many early cases of RA, clinical symptoms are milder and nonspecific, and patients will not fulfil ACR classification criteria for RA. Therefore, the detection of a disease-specific autoantibody like anti-CCP could be of great diagnostic and therapeutic importance. Anti-CCP antibodies may be detected in roughly 50-60% of early RA at baseline. The specificity of anti-CCP is around 95-98% as regards undifferentiated forms that do not develop into RA.

ENA SCREEN

This test is for detection of IgG Antibodies to Extractable Nuclear Antigens (ENA). It is capable of detecting all commonly tested for, such as those against Jo-1, Sm, Scl-70, SSA, SSB, and Scl-70. A single test therefore rules out the need for individual testing. ENA SCREEN is therefore a cost effective and quick test for ruling rheumatic process.

14 SATURDAY Two Thousand Nineteen SEPTEMBER 2019

Mrs. Chowdhary → 9826705434
 Saket

~~Recent blood work done and my RA - Quantitative was 62.5 and ESR was 36. I had lot of pain in my back and joints. After meeting Dr. Arpit Chopra and taking his medicine for just 2 days my RA Quantitative came to 10 and ESR was 10. This was unbelievable result. My pain in back and joints have also reduced to 60%.~~

15 Sunday Thank You So Much doctor for showing him ray of hope in clearing my disease.

**AUTOIMMUNE DISORDER:
RHEUMATOID
ARTHRITIS**

What Is Rheumatoid Arthritis?

When the immune system begins to attack the joints, the synovial fluid becomes thicker, and there is inflammation in and around the joints. This then results in a disease called Rheumatoid Arthritis. This form of

Arthritis of the Human Knee Joint

Normal knee joint

Knee joint with arthritis

Arthritis is inflammation in the joints or area of the body where two bones come together. Joints are responsible for the movement of body parts. It is a condition that can be experienced all over the body or in a specific area. The types range from those related to wear and tear of cartilage, such as osteoarthritis to those associated with inflammation resulting from an overactive immune system, such as rheumatoid arthritis. The one part of the body that is most affected by arthritis is the knee. Knee arthritis can be caused from both rheumatoid or osteoarthritis.

Final Test Report

Page 1 of 1

Specimen	Test Name	Result	Units	Reference Range / Method
SEROLOGY				
Serum	ANTI CCP	<7.00	U/mL	Upto 17.0 (ECLIA)
<p>Note : Anti CCP is useful for diagnosis of early Rheumatoid arthritis. Depending on the severity of Rheumatoid arthritis Positive results occur in 60 to 90% of patients. The predictive value of Anti CCP is greater than RF. Positive results may also occur in patients with seronegative Rheumatoid arthritis.</p>				
Serum	CRP	<1.0	mg/L	<5.0
<p>Note: The CRP response frequently precedes clinical symptoms such as infections, inflammatory diseases and malignant neoplasms. Alterations are detectable within 6 to 8 hours and the peak value is reached within 24 to 48 hours. Levels of up to thousandfold the normal value are associated with severe stimuli such as myocardial infarction, major trauma, surgery, or malignant neoplasms. CRP levels can be elevated in the later stages of pregnancy, birth control pills or hormone replacement therapy (i.e., estrogen) and obesity. Significantly decreased CRP values may be obtained from samples taken from patients who have been treated with carbonylpenicillins. In very rare cases, gammopathy, in particular type IgM (Waldenström's macroglobulinemia) and patients who have been treated or received monoclonal immune antibodies may cause unreliable results. CRP determination may replace the classical determination of Erythrocytes Sedimentation Rate (ESR) and its prompt response to changes in disease activity (CRP increases sooner and then decreases more rapidly than the ESR) and its good correlation to ESR.</p>				
Serum	RA - FACTOR	<10	IU/mL	Less than 14 (Immunoturbidimetric)

Comments:
 Rheumatoid factor is an antibody directed against the Fc portion of the IgG molecule. Polyreactive RF has binding specificity for substances other than IgG like nuclear components. This polyreactive RF is usually of the IgM class with low affinity.
 RF is not specific only for Rheumatoid arthritis, but it is often seen in cases of chronic infections and other systemic inflammatory conditions. Healthy individuals > 65 years of age may also show positive RF results. In addition to the common IgM RF, both IgA RF & IgG RF have been detected. IgA RF has been related to the more severe form of the disease with erosions.

Investigation	Observed Value	Unit	Biological Reference Interval
RA-Rheumatoid Arthritis-IgM, Serum* (serum Rheumatoid)	< 10.0	IU/mL	Non-reactive < 18

Interpretation:
1. The detection of rheumatoid factor (RF) is one of the criteria of the American Rheumatism Association (ARA) for the diagnosis of Rheumatoid Arthritis (RA).
2. RFs play an important role in the differential diagnosis between RA and other rheumatic diseases. They also permit prognostic statements with regards to RA.

RESULTS

C-REACTIVE PROTEIN (CRP) SERUM
 5.3 mg/L (Reference: 0 - 3.0 mg/L)
 Comment: CRP is an acute phase reactant which is used as inflammatory markers for monitoring course and effect of therapy. It is most useful as an indicator of disease activity. Rheumatoid arthritis, Rheumatic fever, SLE, HIV or malaria and infectious aetiology of the liver being higher than ESR and the reaction being earlier than ESR. Under ESR, CRP should not be suppressed by haematocrit conditions like iron deficiency, Polycythemia etc.

Rheumatoid arthritis

Also called: RA

Overview Symptoms Treatments New

A chronic inflammatory disorder affecting many joints, including those in the hands and feet.

In rheumatoid arthritis, the body's immune system attacks its own tissue, including joints. In severe cases, it attacks internal organs.

Common

More than 1 million cases per year (India)

- Treatment can help, but this condition can't be cured
- Requires a medical diagnosis
- Lab tests or imaging always required

ORGANS & SYSTEMS AFFECTED BY RHEUMATOID ARTHRITIS

Fibromyalgia

Also called: fibrositis

- Overview
- Symptoms
- Treatments

Widespread muscle pain and tenderness.

Fibromyalgia is often accompanied by fatigue and altered sleep, memory and mood.

Very common

More than 10 million cases per year (India)

RHEUMATOID ARTHRITIS PANEL

Parameters Name	Result	Unit	Biological Ref. Interval
RA FACTOR IgG (RAIgG) ANTIBODY BY ELISA	2.2	Blood	< 30 Negative, 30-40 Equivocal, > 40 Positive

Special Remark :-
 • Rheumatoid factor (RF) is the autoantibody (antibody directed against an organism's own tissues) that was first found in rheumatoid arthritis. It is defined as an antibody against the Fc portion of IgG (an antibody). RF and IgG join to form immune complexes that contribute to the disease process.
 • It is also found in Epstein-Barr virus or parvovirus infection and in 5-10% of healthy persons, especially the elderly.
 • The test results must be interpreted in conjunction with the patient clinical information and other laboratory results.

AUTOIMMUNE DISEASE PANEL

Parameters Name	Result	Unit	Biological Ref. Interval
ANA BY IMMUNOFLUORESCENCE (IMF)	POSITIVE	Blood	

The Test is: Pattern Of Immunofluorescence: CYTOPLASMIC, SPECKLED
 Grade: +
 Remark: ADV. ENA. PLEASE CORRELATE CLINICALLY

after Modern Homoeopathy treatment

03 WEDNESDAY - AUGUST "FIBROMYALGIA"

मैं विश्वास शर्मा, इन्दौर का निवासी हूँ। मुझे काफी समय से ठंडा, पैर में दर्द और सुजान की समस्या आ रही थी, जिसको देखते हुए खुद ही कुछ टेस्ट करवा कर रिपोर्ट निकलवाई। उसके बाद एलोपैथी इमरजेंसी में भर्ती कराया गया। डॉक्टर ने ANA टेस्ट करवाया, जो कि पॉजीटिव आया। इसी बीच मैं एक दोस्त ने इसी तरह के ट्रीटमेंट में मुझे डॉ. अर्पित चौपड़ा का पत्र देकर मुझे डॉ. अर्पित चौपड़ा के ट्रीटमेंट में भर्ती करवा दिया। डॉ. अर्पित चौपड़ा ने मुझे 15 दिन का ट्रीटमेंट दिया जिसे मैंने अच्छे से फॉलो किया और दर्द बिल्कुल खत्म हो गया। मैंने डॉ. अर्पित चौपड़ा का पत्र देकर डॉ. अर्पित चौपड़ा को धन्यवाद दिया।

डॉ. अर्पित चौपड़ा के ट्रीटमेंट के मुझे दर्द में भी बहुत आराम मिला और मुझे इस तरह की एलोपैथी दवाइयों की जरूरत नहीं पड़ी। अब मैं अपनी अच्छी महसूस हो रहा हूँ। मैंने डॉ. अर्पित चौपड़ा और स्टाफ को धन्यवाद दिया।

बहुत बहुत धन्यवाद सर

विश्वस शर्मा

What is Hyperuricemia?

What is Hyperuricemia?

A medical disease known as hyperuricemia occurs when there is an excessively high quantity of uric acid in the blood of the patient.

Elevated uric acid

Overview

Treatments

An excess of uric acid in the blood.

COMMON CAUSES

Elevated uric acid can have causes that aren't due to underlying disease. Examples include alcohol consumption, high levels of meat ingestion or high levels of seafood ingestion.

Rheumatoid arthritis

Also called: RA

A chronic inflammatory disorder affecting many joints, including those in the hands and feet.

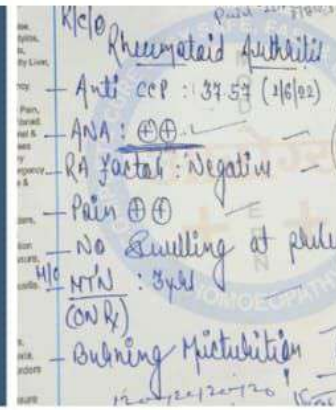

In rheumatoid arthritis, the body's immune system attacks its own tissue, including joints. In severe cases, it attacks internal organs.

Common

Rheumatoid Arthritis

You might be aware of joint pain, but it's important to be aware of the other Rheumatoid Arthritis symptoms that can help clinch a diagnosis

Medanta - Indore

ANJU DEVI Reference: Dr.SOURABH MALVIYA VID: 22003100000032

Sample Collected At: Global Health Limited, Plot No. 6, Ph 4, Scheme No. 54-Vijay Nagar, Indore, MP-492010

Observed Value: Positive(37.57) Unit: IU/mL Biological Reference Interval: Negative: < 17, Positive: >= 17

Antibody Cyclic Citrullinated Peptide (Anti-CCP)

Antibody Cyclic Citrullinated Peptide (Anti-CCP) is used for the semi-quantitative determination of the IgG class of auto antibodies specific to CCP in biological specimens. Detection of anti-CCP antibodies is used as an aid in the diagnosis of Rheumatoid Arthritis and should be used in conjunction with other clinical information. Autoantibody levels represent one parameter in a multi criteria diagnostic process, encompassing both clinical and laboratory based assessments.

High levels of CCP antibodies may be useful to identify patients with aggressive disease. Further studies are needed to document the association. The level of CCP antibodies may also correlate with disease activity in RA, but further studies are needed to document this clinical application.

LABORATORY REPORT

Name: ANJU PANDEY 13975621 Sex/Age: Female / 49 Years Case ID: 30801800403

Ref. By: Dr. AI PT ID: [Blank]

Reg Date and Time: 02-Aug-2023 17:16 Sample Type: Serum Pt Loc: [Blank]

Report Date and Time: 02-Aug-2023 19:32 Acc. Remarks: [Blank]

TEST	RESULTS	UNIT	BIOLOGICAL REF RANGE	REMARKS
Anti CCP Level (CMIA)	1.00	IU/mL	0 - 5	

INTERPRETATION

- Rheumatoid arthritis (RA) is a systemic autoimmune disease characterized by chronic joint inflammation that ultimately leads to joint destruction. Although 80% to 90% of patients with RA are RF-positive, the specificity of the RF test is known to be relatively poor. RF is found in many patients with other autoimmune diseases, infectious diseases and some healthy individuals. Most studies of anti-CCP antibodies demonstrated that these autoantibodies have much improved specificity for RA compared to RF.
- A positive result for cyclic citrullinated peptide (CCP) antibodies indicates a high likelihood of rheumatoid arthritis (RA).
- High levels of CCP antibodies may be useful to identify patients with aggressive disease. Further studies are needed to document the association. The level of CCP antibodies may also correlate with disease activity in RA, but further studies are needed to document this clinical application.

CAUTIONS: Positive results for cyclic citrullinated peptide (CCP) antibodies may occur in patients with other autoimmune, connective tissue diseases. Anti-rheumatic therapy should not be initiated solely on a positive test for CCP antibodies, and changes in treatment should not be based upon the levels of CCP antibodies.

Dilution Protocol: Approved and validated up to 1:19 dilution.

Interpretation

RESULT IN UNITS	REMARKS
<20	Negative
20-60	Moderate positive
>60	Strong positive

Comments
Antinuclear antibodies are the most sensitive screening test for autoantibodies in patients suspected of connective tissue diseases. They are a heterogeneous group of autoantibodies directed against ds-DNA, histones, SSA / Ro, SSB / La, Sm, Sm / RNP, Scl-70, Jo-1 & Centromere. ANA 's have also been detected in patients with Autoimmune Hepatitis (80%), Primary biliary cirrhosis (80%), Alcohol related liver disease (50%), Viral hepatitis B (40%). Presence of ANA has also been detected in individuals taking certain drugs like Hydrochlorazine, Isoniazid, Chlorpromazine; family of SLE patients; healthy and elderly persons

Reg. Location : Pune, Pune U S Pathology Services

Collected : 30-Dec-2023 / 10:04
Reported : 30-Dec-2023 / 11:31

RA - QUANTITATIVE TEST

PARAMETER	RESULTS	BIOLOGICAL REF RANGE	METHOD
RA (Rheumatoid Factor-RF), Serum	Less than 10.0	< 14 IU/ml	Irrm.Turbidimetry

Clinical Significance:
1) RF is an immunoglobulin present in the serum of 50-90% of adults with rheumatoid arthritis & used as an aid in the diagnosis of rheumatoid arthritis.
2) Rheumatoid factors are a heterogeneous group of autoantibodies directed against the antigenic determinants on the Fc-region of IgG molecules.

Interpretation:

- Increased in:
1) Systemic Lupus erythematosus (SLE)
2) Polyomyelitis
3) Tuberculosis, syphilis, viral hepatitis, infectious mononucleosis, and influenza

Reflex Tests:

- 1) Anti CCP
2) Radiological investigation (X-Ray)

CRP-QUANTITATIVE TEST

PARAMETER	RESULTS	BIOLOGICAL REF RANGE	METHOD
CRP-QUANTITATIVE, Serum	Less than 1	1-5 mg/l	Irrm.Turbidimetry

Interpretation:
CRP elevations are nonspecific and may be useful for the detection of systemic inflammatory processes like:

- To assess treatment of bacterial infections with antibiotics
- To differentiate between active and inactive forms of disease with concurrent infection
- Postoperative monitoring, to determine the presence of postoperative complications at an early stage, such as infected wounds, thrombosis, and pneumonia.

Clinical Significance:

- C-reactive protein (CRP) is an acute phase reactant, a protein made by the liver and released into the blood within a few hours after tissue injury, the start of an infection, or other cause of inflammation.
- The test measures the amount of CRP in the blood and can be valuable in detecting inflammation due to acute conditions or in monitoring disease activity in chronic conditions.
- In normal healthy individuals CRP is a trace protein, after onset of an acute phase response the serum CRP concentration rises rapidly and extensively. Elevations are detectable within 6 to 8 hours and the peak value is reached within 24 to 48 hours.
- Levels of up to thousand fold the normal value are associated with severe stimuli such as myocardial infarction, major trauma, surgery, or malignant neoplasms.
- CRP has a half-life of only a few hours, making it an ideal tool for clinical monitoring. Postoperative monitoring of CRP levels of patients indicates either the normal recovery process (decreasing levels to normal) or unexpected complications (persisting high levels).
- Persistence of a high serum CRP concentration is usually a grave prognostic sign which generally indicates the presence of an uncontrolled infection.
- CRP elevations are not useful for the clinical determination of Rheumatoid Factor (RF) due to the common presence of

Rheumatoid Arthritis

You might be aware of joint pain, but it's important to be aware of the other Rheumatoid Arthritis symptoms that can help clinch a diagnosis

Do you Know?

The two most common diseases associated with **Hyperuricemia** are

Gout **Uric Acid Nephrolithiasis**

What is the difference between gout and hyperuricemia?

Hyperuricemia is an elevated uric acid level in blood. Gout is a common systemic metabolic disease characterized by deposition of monosodium urate monohydrate crystals with resultant acute intense inflammation of the involved joint.

Rheumatoid Arthritis

How to protect your joints, reduce pain, and improve mobility

In rheumatoid arthritis, the body's immune system attacks its own tissue, including joints. In severe cases, it attacks internal organs.

Common

More than 1 million cases per year (India)

- Treatment can help, but this condition can't be cured
- Requires a medical diagnosis
- Lab tests or imaging always required
- Chronic: can last for years or be lifelong

eiaci Shri Sai Baba Hospital & Research Centre

RHEUMATOID FACTOR (RA) SERUM

RA (QUANTITATIVE): 14.85 U/ml up to 20

Result: **Normal**

Comment:
 Rheumatoid factor is an antibody directed against the Fc portion of the IgG molecule. Positive RF has leading specificity for antibodies other than IgG like nuclear components. The presence of RF is usually of the IgM class with low affinity.
 RF is not specific only for Rheumatoid arthritis, but it is often seen in cases of chronic infection and other systemic inflammatory conditions. Healthy individuals > 50 years of age may also show positive RF results. In addition to the common IgM RF, both IgG RF & IgA RF have been detected. IgA RF has been related to the more severe form of the disease with erosions.

Test Description	Value(s)	Unit(s)	Reference Range
ANTI-CCP ANTI-BODY	38.4	EU/ml	0-25

INTERPRETATION & LIMITATIONS: Detection of anti-CCP antibodies is used as an aid in the diagnosis of Rheumatoid Arthritis (RA) and should be used in conjunction with other clinical information. Rheumatoid Arthritis (RA) is a chronic, systemic autoimmune disease affecting 0.5-1% of the population. It is the result of RA patients having a variety of antibodies directed against self-antigens. The most widely known of these autoantibodies is the Rheumatoid Factor (RF) antibody directed against the extrinsic domain of IgG molecules. The presence of RF is one of the diagnostic criteria for RA. Although the RF test has good sensitivity for RA, it is not very specific for the disease as it can also be observed in the serum of patients with other rheumatic and non-rheumatic disorders and even in a substantial percentage of the healthy healthy population. Anti-CCP antibodies (anti-CCP) are highly specific for RA. The European League Against Rheumatism (EULAR) published guidelines for the diagnosis of early RA, and the measurement of antibodies to anti-CCP was included as a serologic marker. For diagnostic purposes, the anti-CCP results should be used in conjunction with other clinical data (e.g., symptoms, medical history, etc.). If the results are inconclusive with clinical evidence, additional testing is suggested to further the result. The value of anti-CCP is positive, unless for not been determined.

Report relates to the sample submitted.
Normal reference ranges for clinical laboratory. Please consult directly as well as with other diagnostic findings, if these results are required in case of any inquiry. This report is not valid for medicolegal purposes.
This is an Electronically Authenticated Report.

Service Project Infrastructure: Making Medical Care Accessible to All

"Medical facilities should be accessible to the common man in every way." Dr. Arpit Chopra Jain

To make his groundbreaking medical invention available to the general public, Professor Dr. Arpit Chopra Jain has established the Aarogya Super Speciality - Modern Homoeopathy Clinic, equipped with state-of-the-art facilities, at Janjirwala intersection in the heart of Indore city. At this clinic, patients have access to comprehensive consultation, diagnosis, and treatment for various diseases, all under one roof.

In addition, a dedicated consultation room for online patients has been set up to offer virtual consultations. Medicines are delivered through courier services, ensuring that even the most serious conditions can be treated from the comfort of one's home. Dr. Arpit Chopra Jain's initiative ensures that high-quality healthcare is not just limited to in-person visits but is also accessible to those in distant locations.

Dr. Arpit Chopra Jain: A Commitment to Service and Responsibility

Dr. Arpit Chopra Jain, raised in a family of doctors, embodies the true essence of a dedicated medical professional. With a deep sense of responsibility toward human welfare, he has revolutionized healthcare through his groundbreaking invention of Super Speciality Modern Homoeopathy treatment. His work has provided a new direction in treating complex diseases, ensuring that even those who once felt hopeless have found relief.

campaign to combat sickle cell anemia, Dr. Arpit Chopra Jain is also working tirelessly in tribal areas. His efforts contribute significantly to the permanent and successful treatment of this genetic disorder, further reflecting his unwavering commitment to the welfare of humanity.

Dr. Arpit Chopra Jain also organizes medical camps aimed at diagnosing complex diseases, providing free consultations to those in need. His sense of duty was especially evident during the devastating COVID-19 pandemic, where he took extraordinary measures to help his community. Understanding the gravity of the situation, he distributed free Corona prevention medicines to approximately 2,25,000 people, including Corona Warriors, potentially saving many lives.

Dr. Arpit Chopra Jain exemplifies what it means to be a physician who balances medical practice with social responsibility, continuing to make a profound impact on both individual lives and society as a whole.

Recognizing the significance of his role, Dr. Arpit Chopra Jain extends his responsibilities beyond medical practice. He considers it his moral and national duty to contribute to various social service activities. Along with treating complicated medical conditions, Dr. Arpit Chopra Jain is committed to shaping the future of homoeopathy. He actively mentors and educates new students entering the field, helping them gain the knowledge necessary to advance in medical science.

Samman Awards: A Tribute to Responsibility and Service

"Respect received from society increases responsibility." Dr. Arpit Chopra Jain

Dr. Arpit Chopra Jain believes that when one contributes responsibly and at the right time, society offers its respect. However, with that respect comes an even greater sense of responsibility.

Dr. Arpit Chopra Jain, through his groundbreaking invention of the Arogya Super Speciality Modern Homoeopathy medical system and his numerous social contributions, has garnered widespread recognition. His dedication to improving the health and well-being of others has not gone unnoticed. He has been honored by many prominent ministers, intellectuals, and senior artists across various dignified platforms. These awards have been bestowed upon him by social, national, and international institutions, further acknowledging his remarkable contributions to the field of medicine and humanity.

This recognition only fuels Dr. Arpit Chopra Jain's determination to continue serving society with even greater dedication and responsibility.

Media Recognition: A Source of New Enthusiasm and Energy

"Appreciation received through media gives us new enthusiasm and new energy." Dr. Arpit Chopra Jain

The work carried out by Professor Dr. Arpit Chopra Jain, especially his modern invention of the Aarogya Super Speciality Modern Homoeopathy treatment, has been widely acknowledged across various communication platforms. His dedication to serving humanity and offering innovative medical solutions has captured the attention of many renowned newspapers, news channels, and social media outlets.
